

The Office of the Future – smart collaboration systems

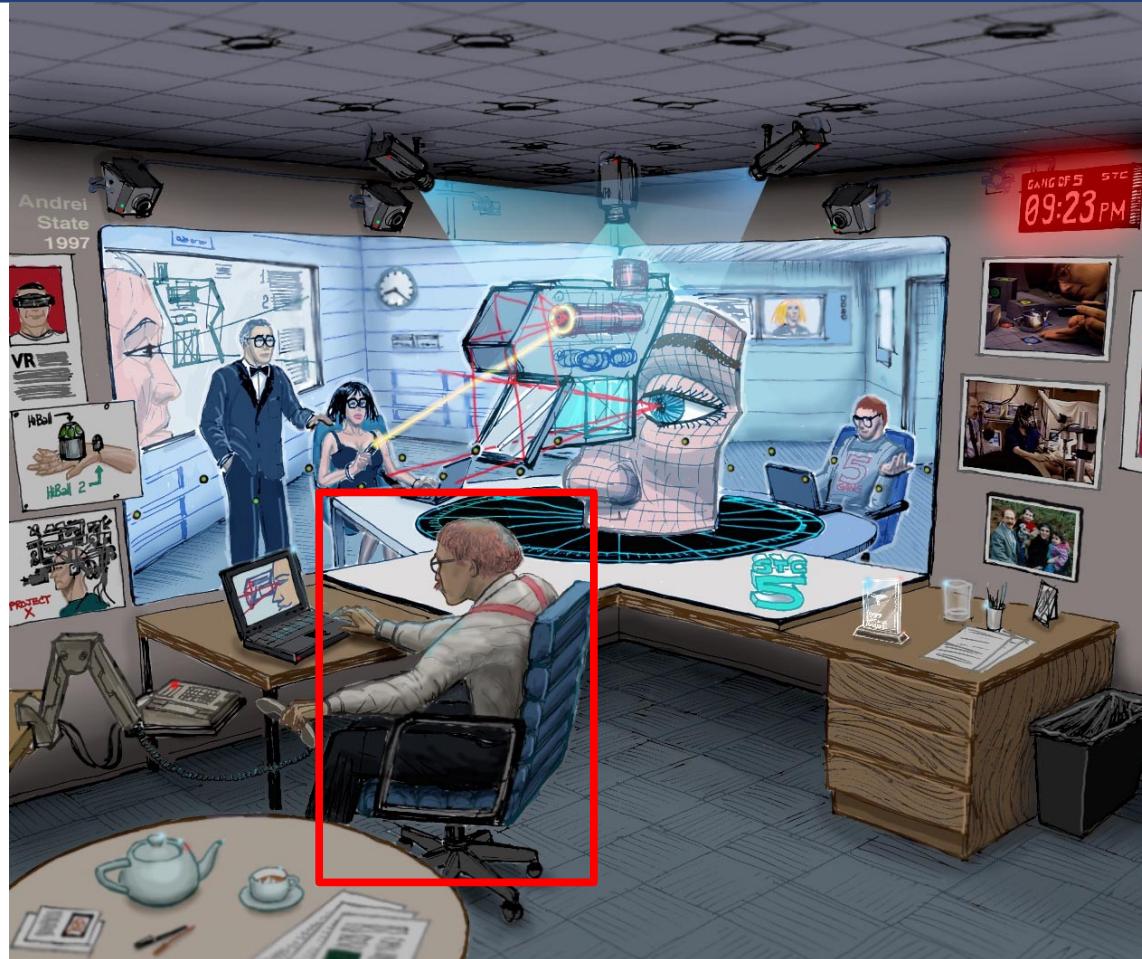

Carlo Beltrame
Ubiquitous Computing Seminar 2014

Vision

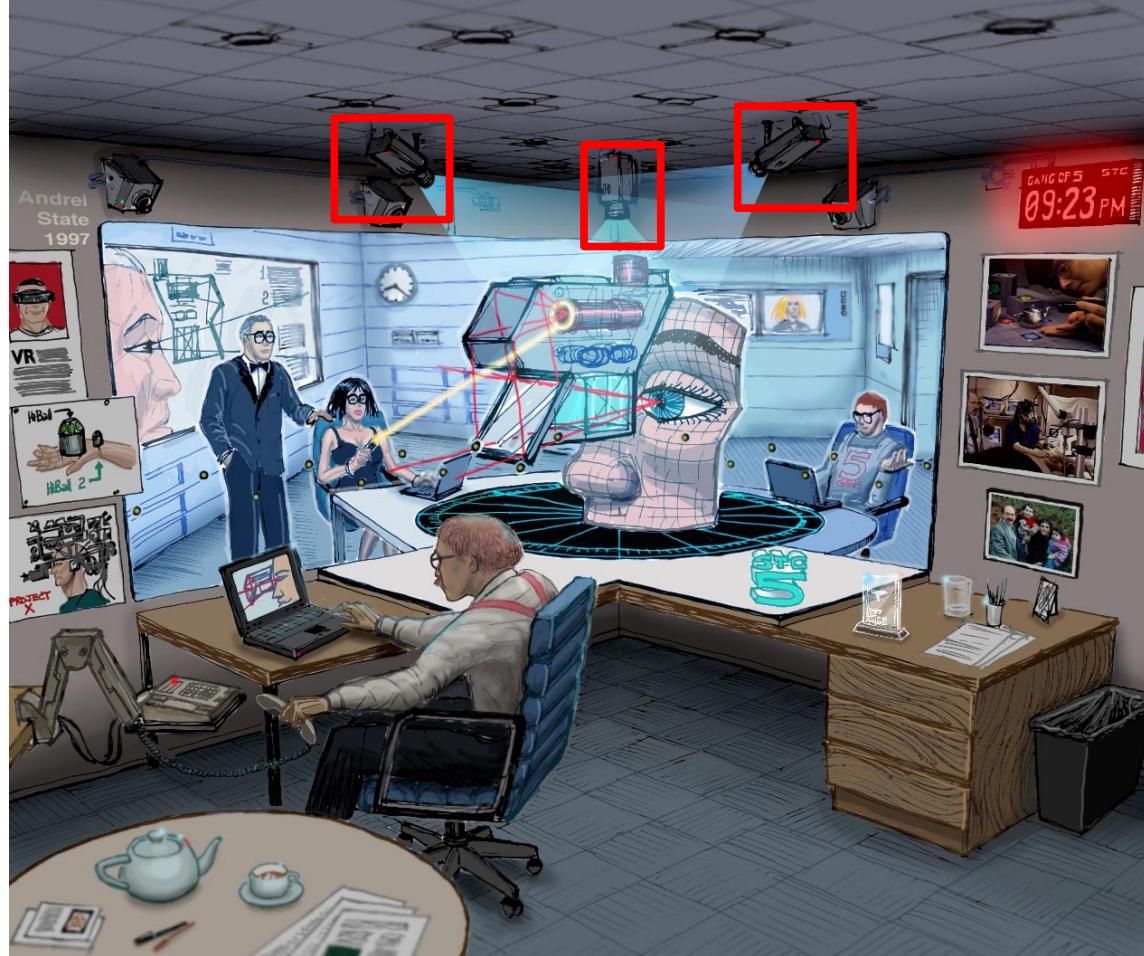

[Raskar1998]

Vision

[Raskar1998]

Vision – projectors

[Raskar1998]

Vision – projection surfaces

[Raskar1998]

Vision – projection turned off

[Raskar1998]

Vision – projection turned off

[Raskar1998]

Vision – uneven projection surface

[Raskar1998]

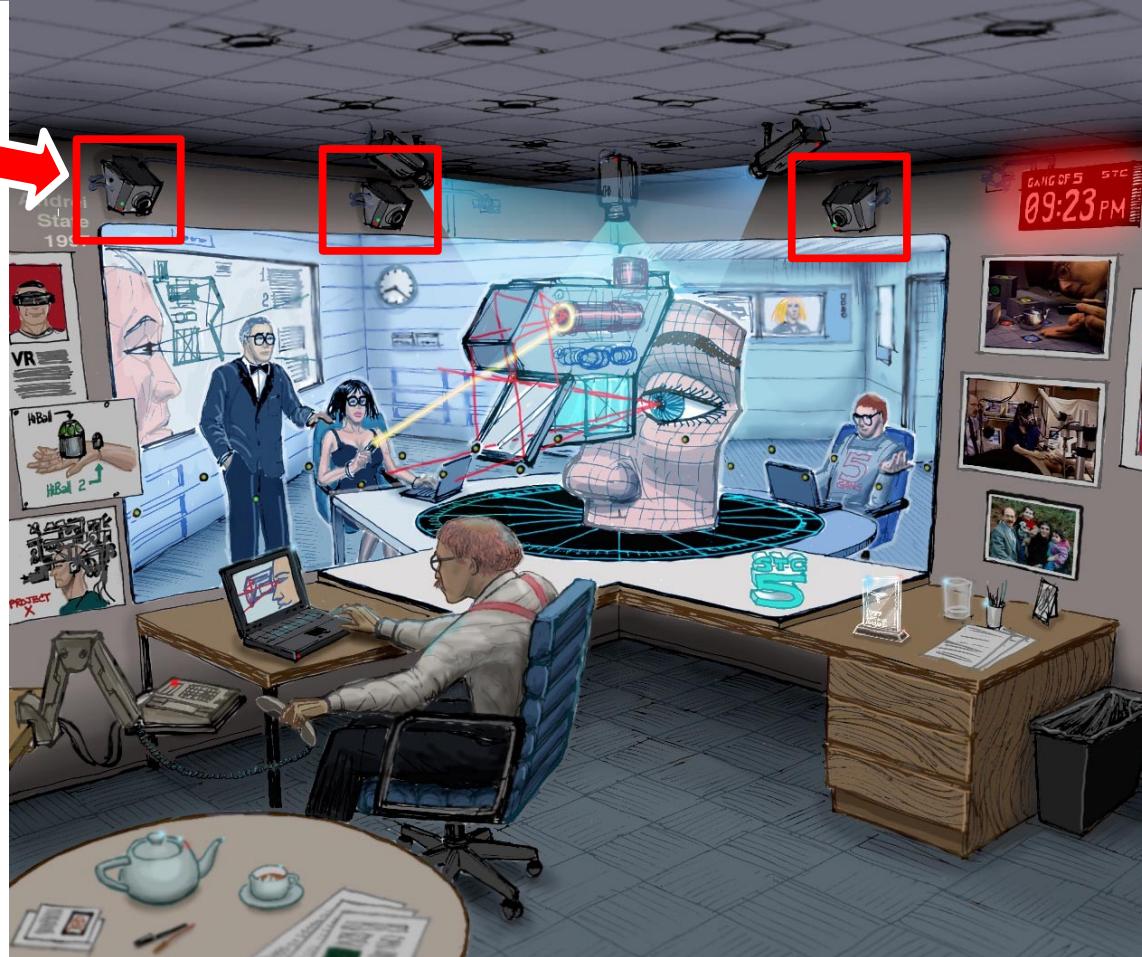

Vision – uneven projection surface

[Raskar1998]

Scene Capture

capture device

[Raskar1998]

Kinect

Kinect

150\$

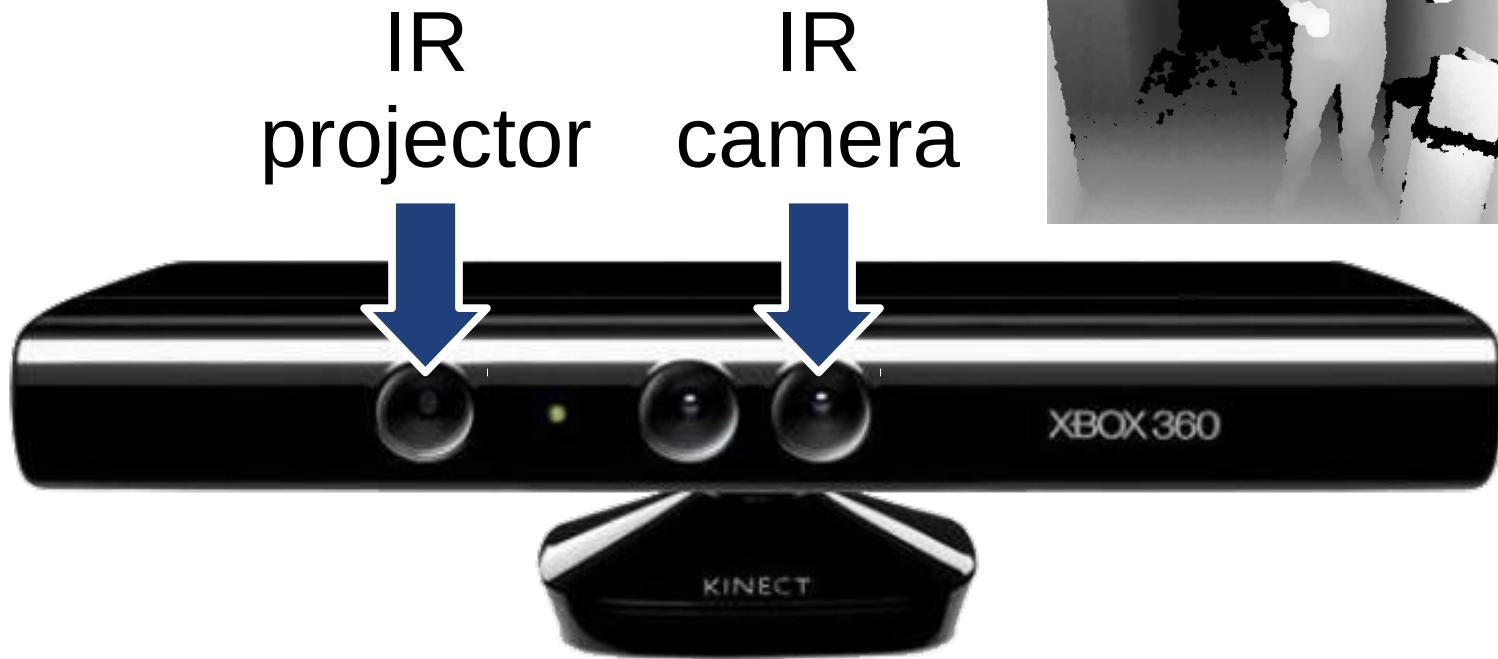

Kinect – RGB camera

RGB
camera

Kinect – depth sensor

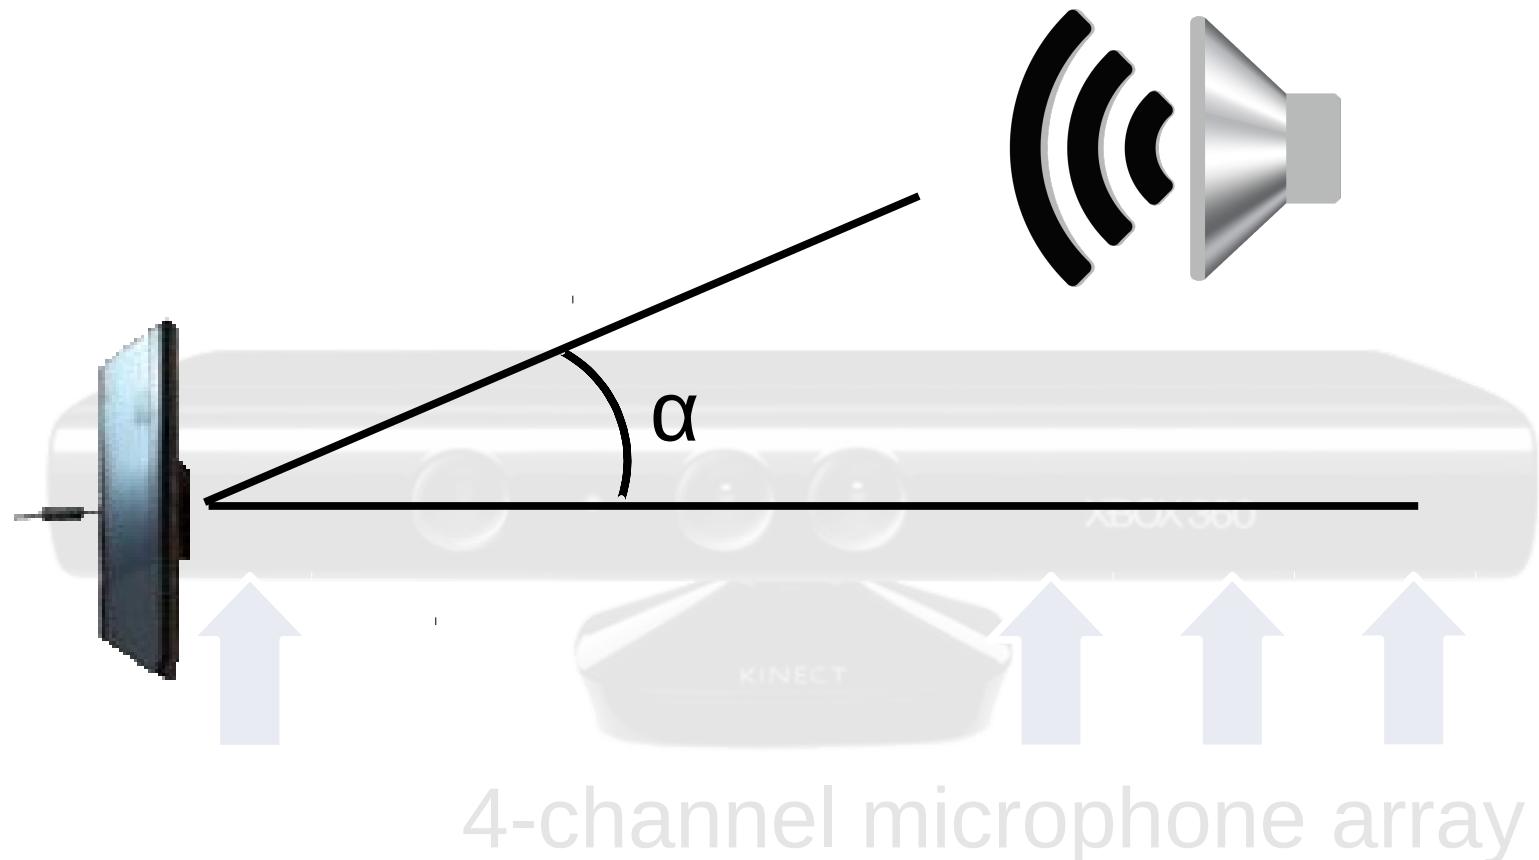

Kinect – microphone array

4-channel microphone array

Kinect – audio source angle

RGB camera

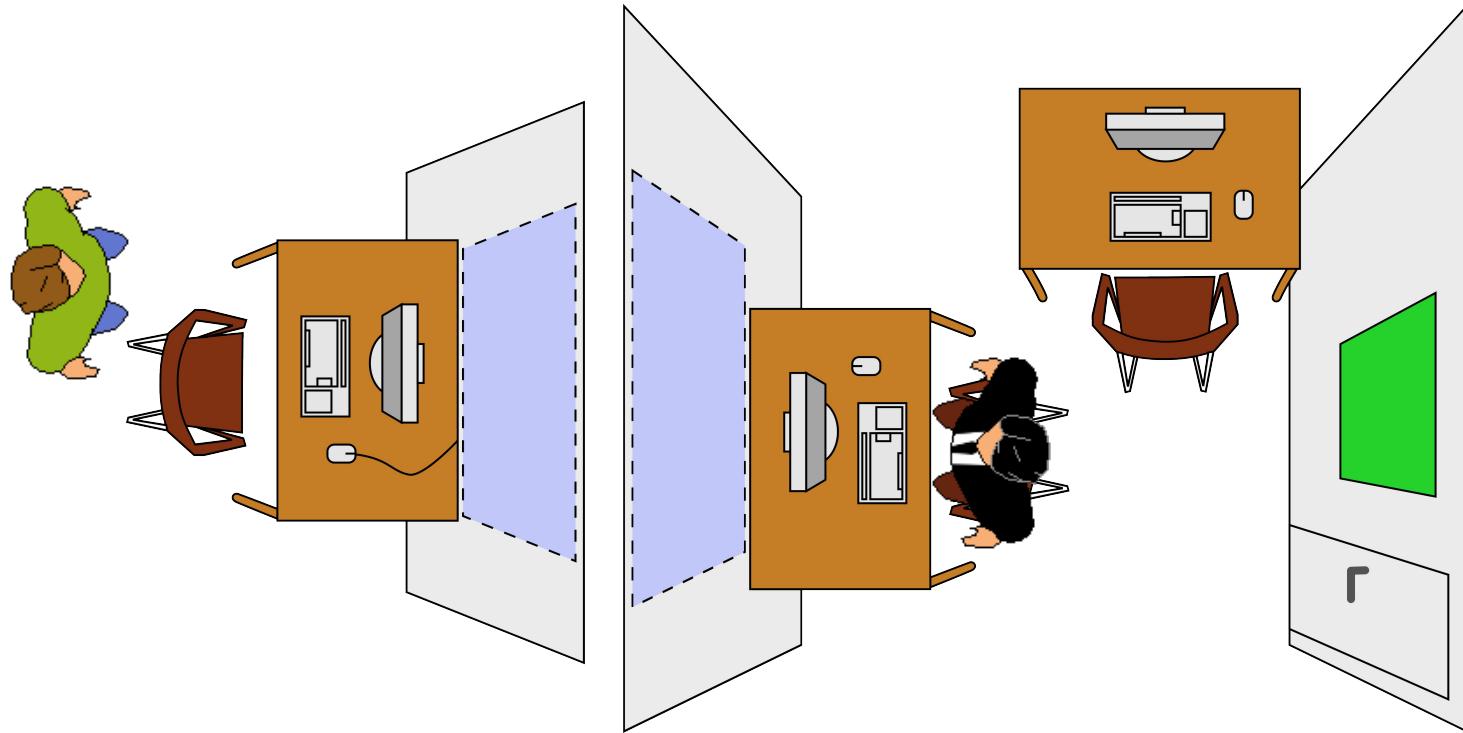

RGB camera – frustum

RGB camera – widescreen capture

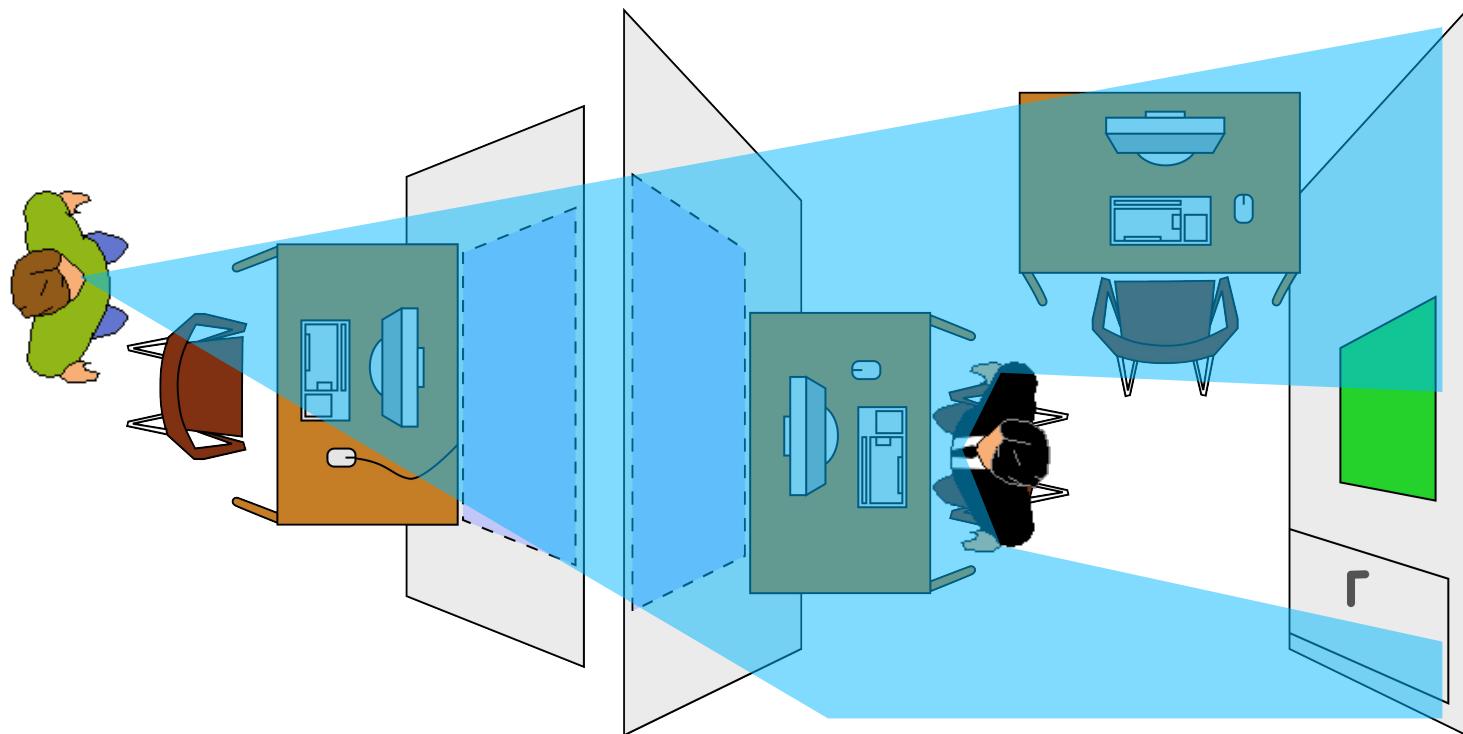

Scene Capture

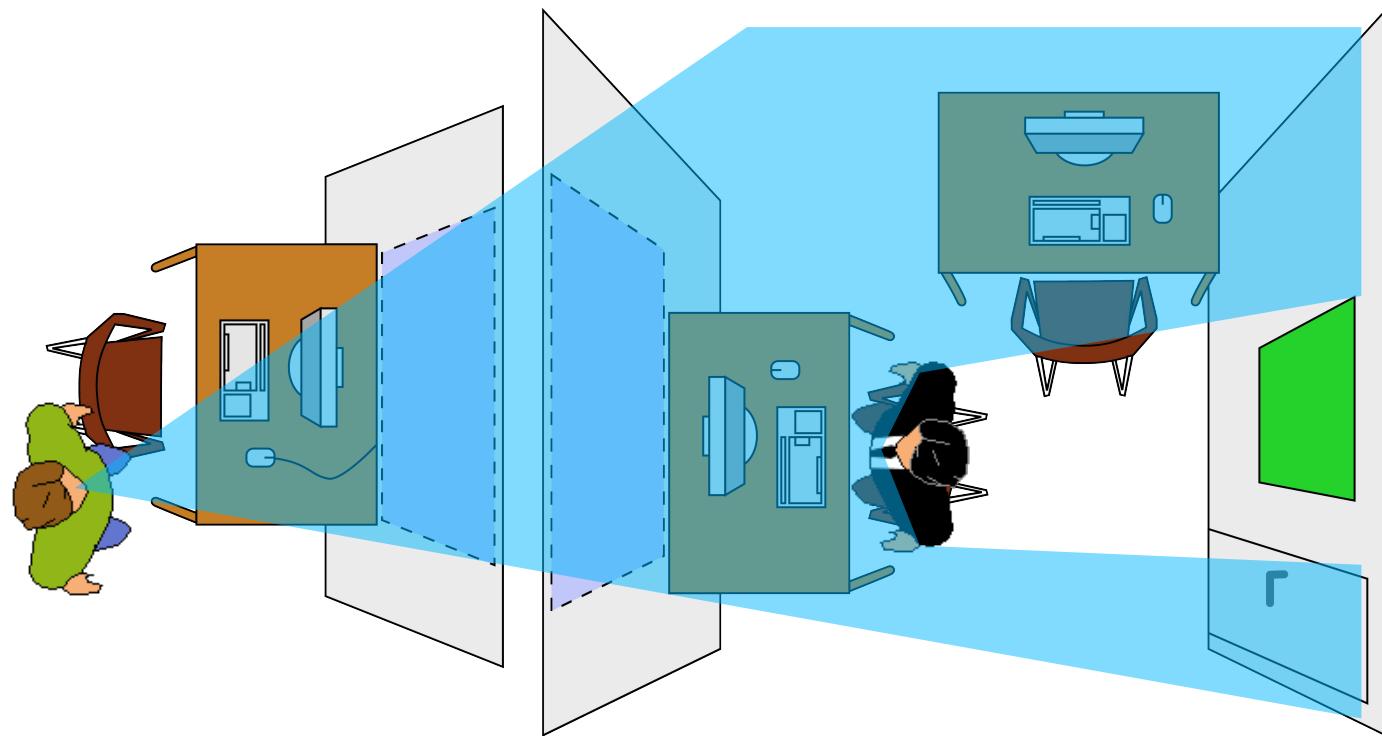

Adapted from [Maimone2012a]

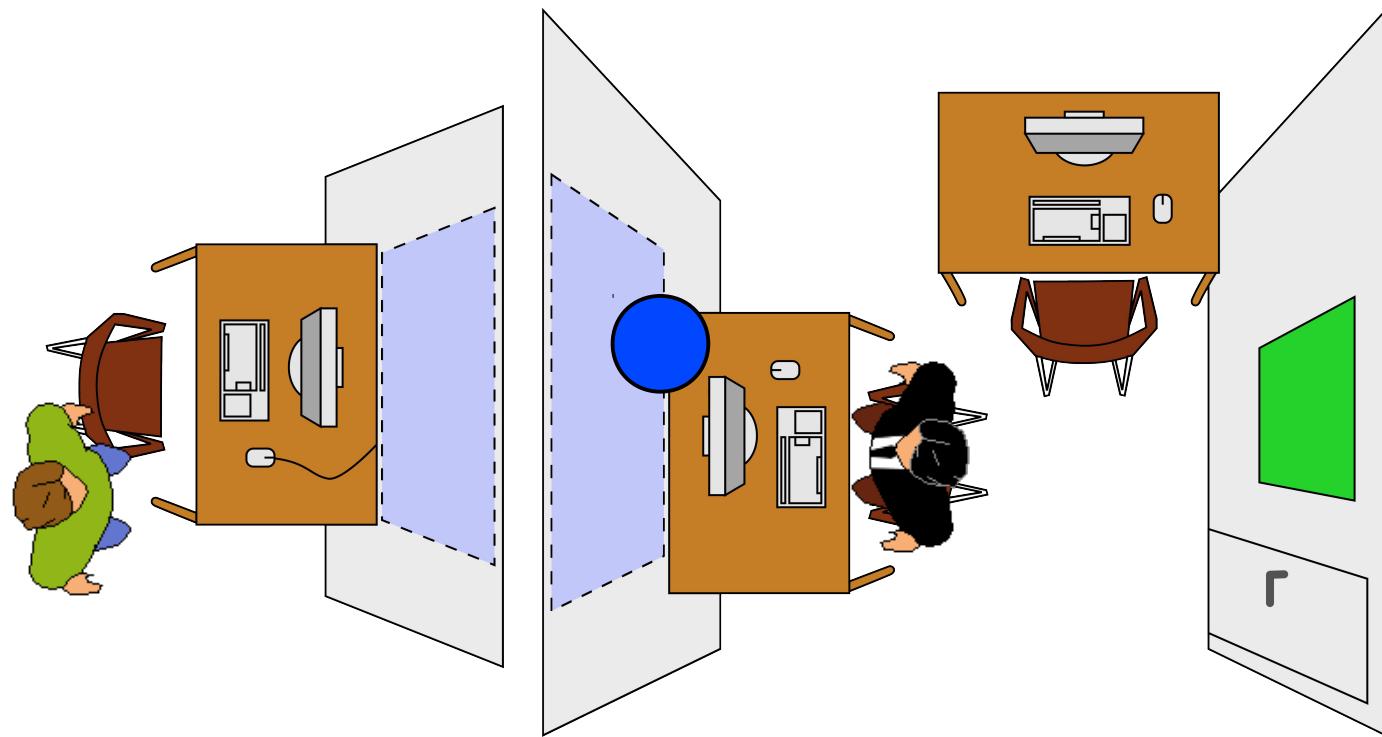

Scene Capture

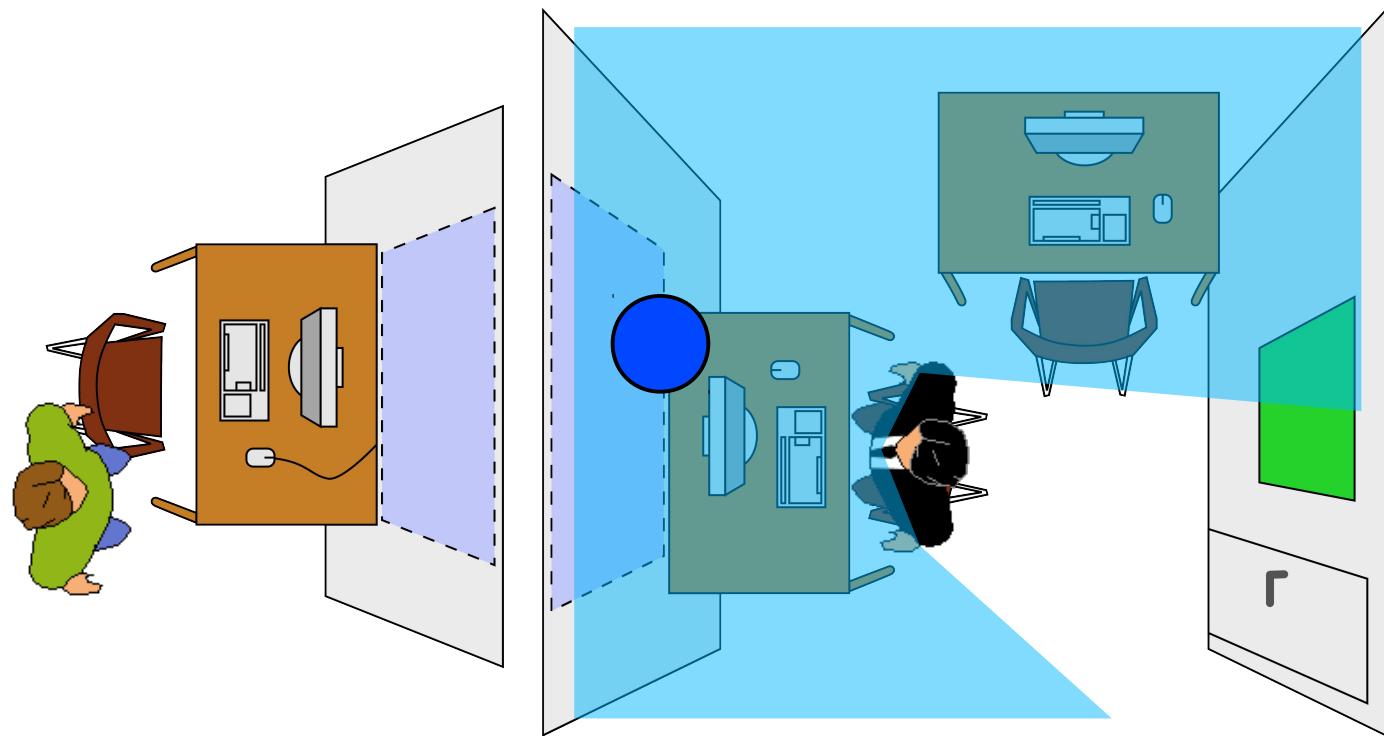

Scene Capture – viewpoint change

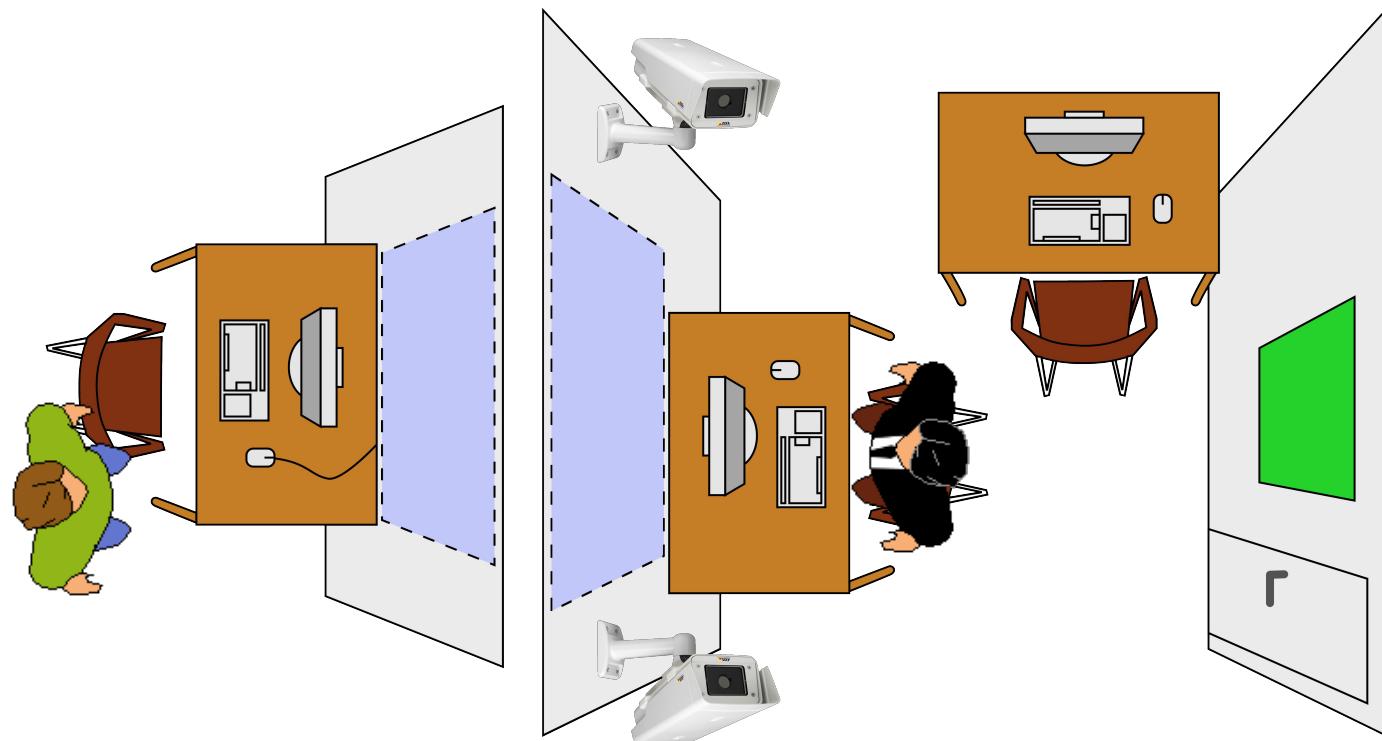

Scene Capture – 360° camera

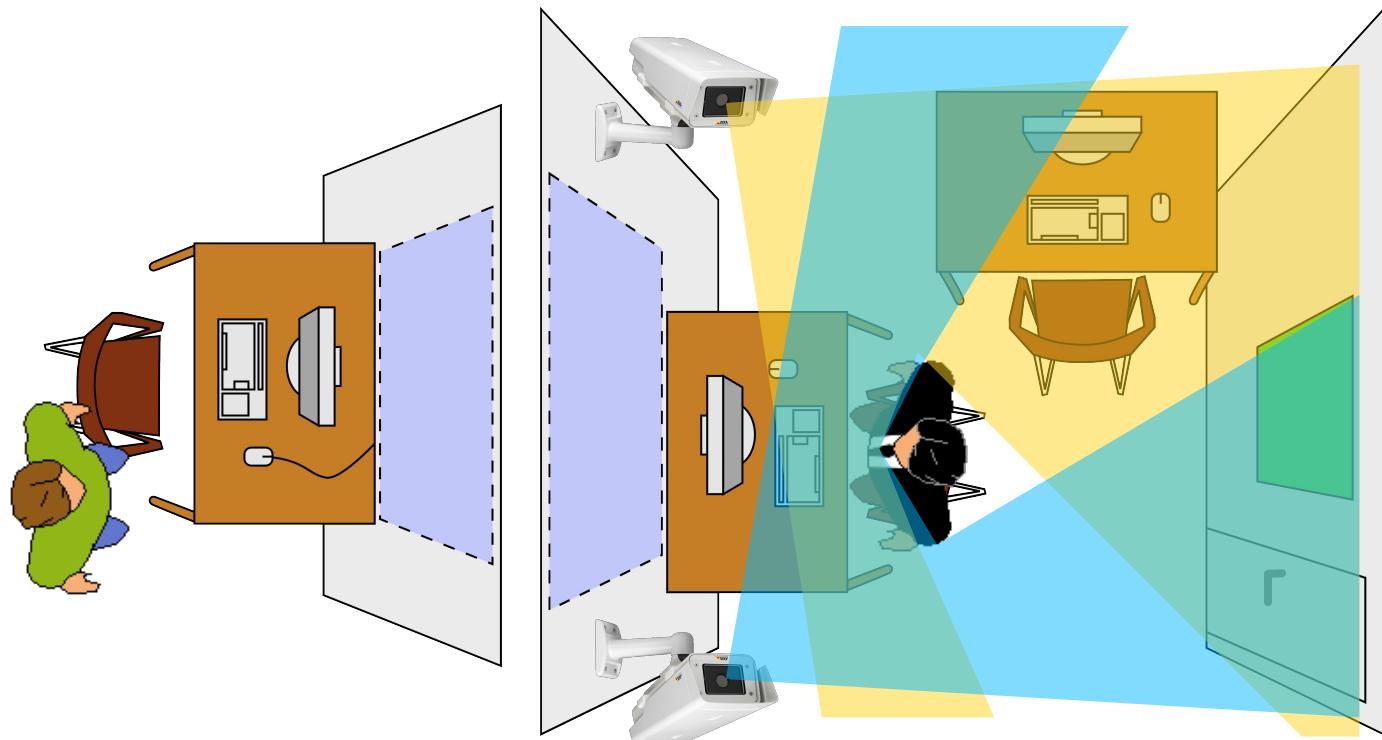

Scene Capture – 360° camera

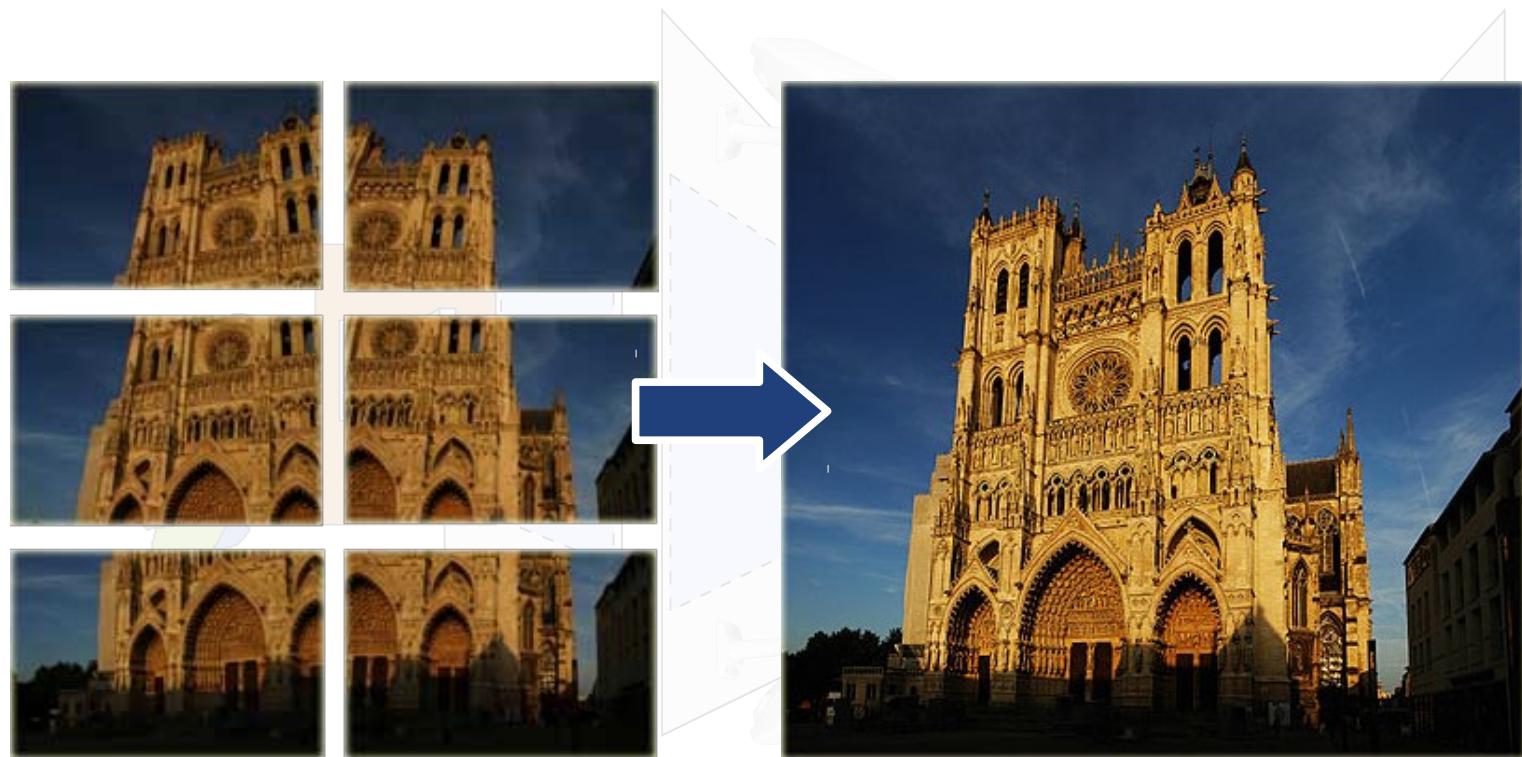

Scene Capture – multiple cameras

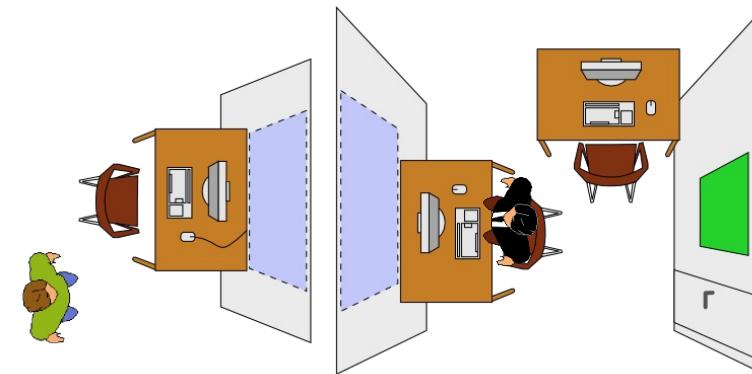

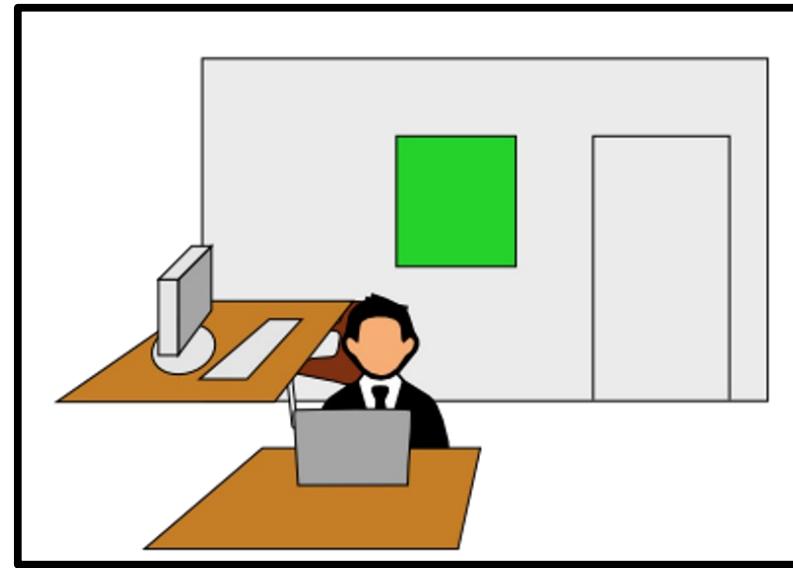

Scene Capture – multiple cameras

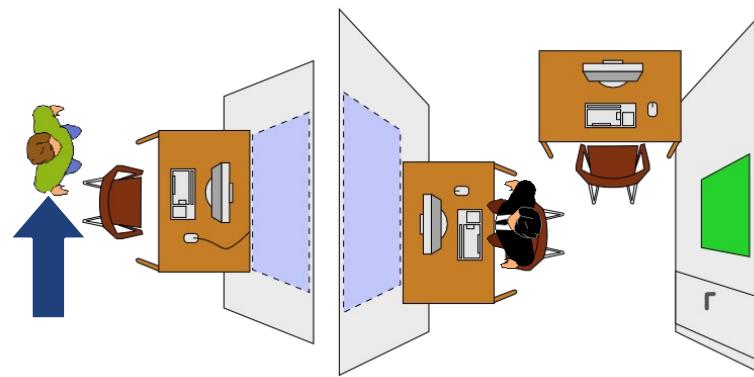

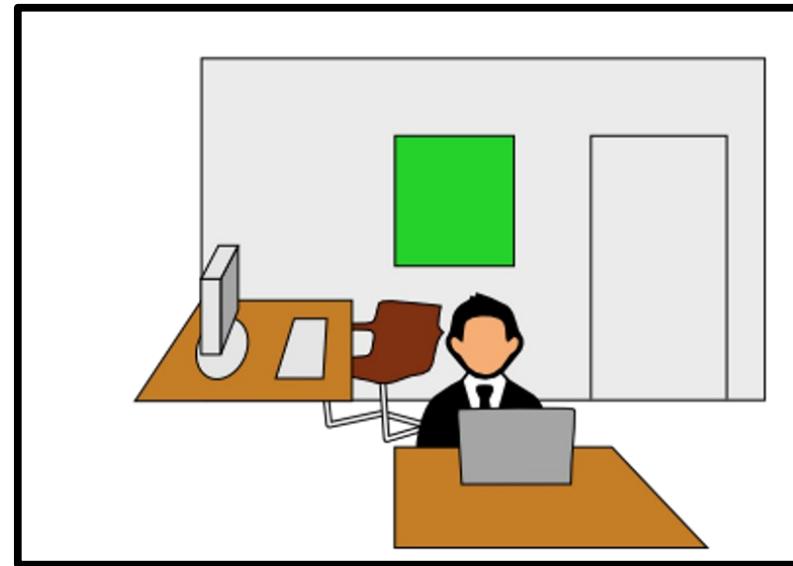

Scene Capture – image stitching

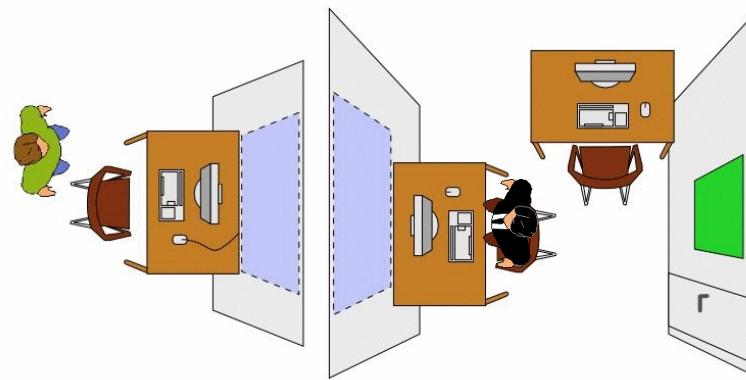

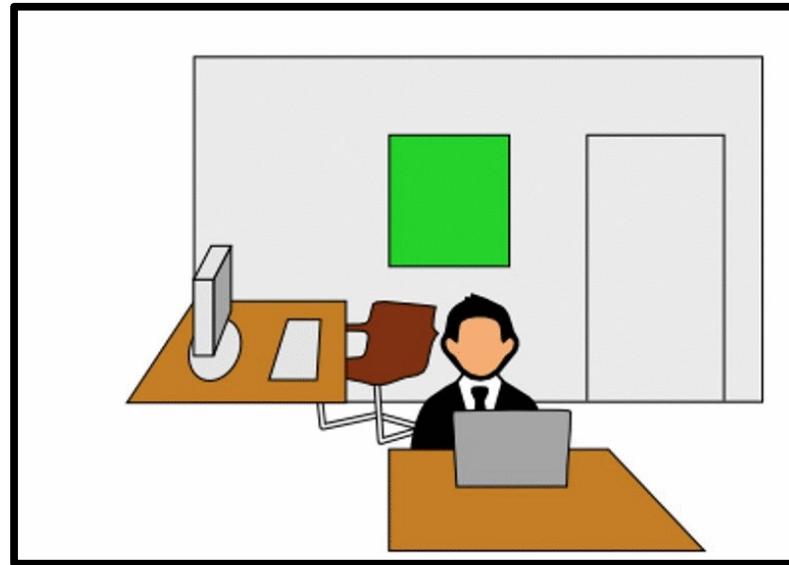

Scene Capture – viewpoint change

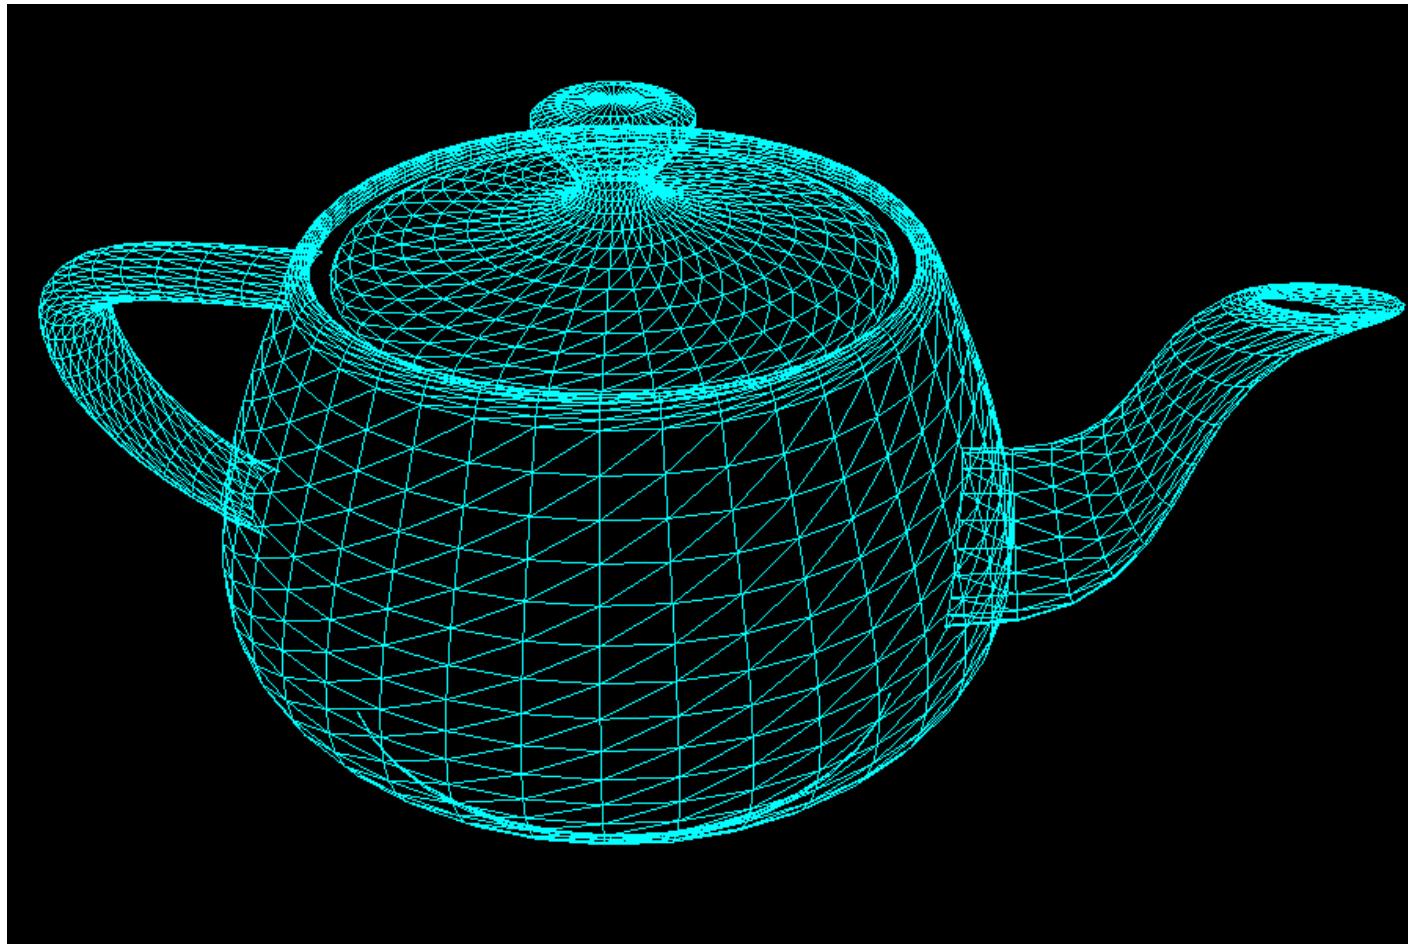

Scene Capture

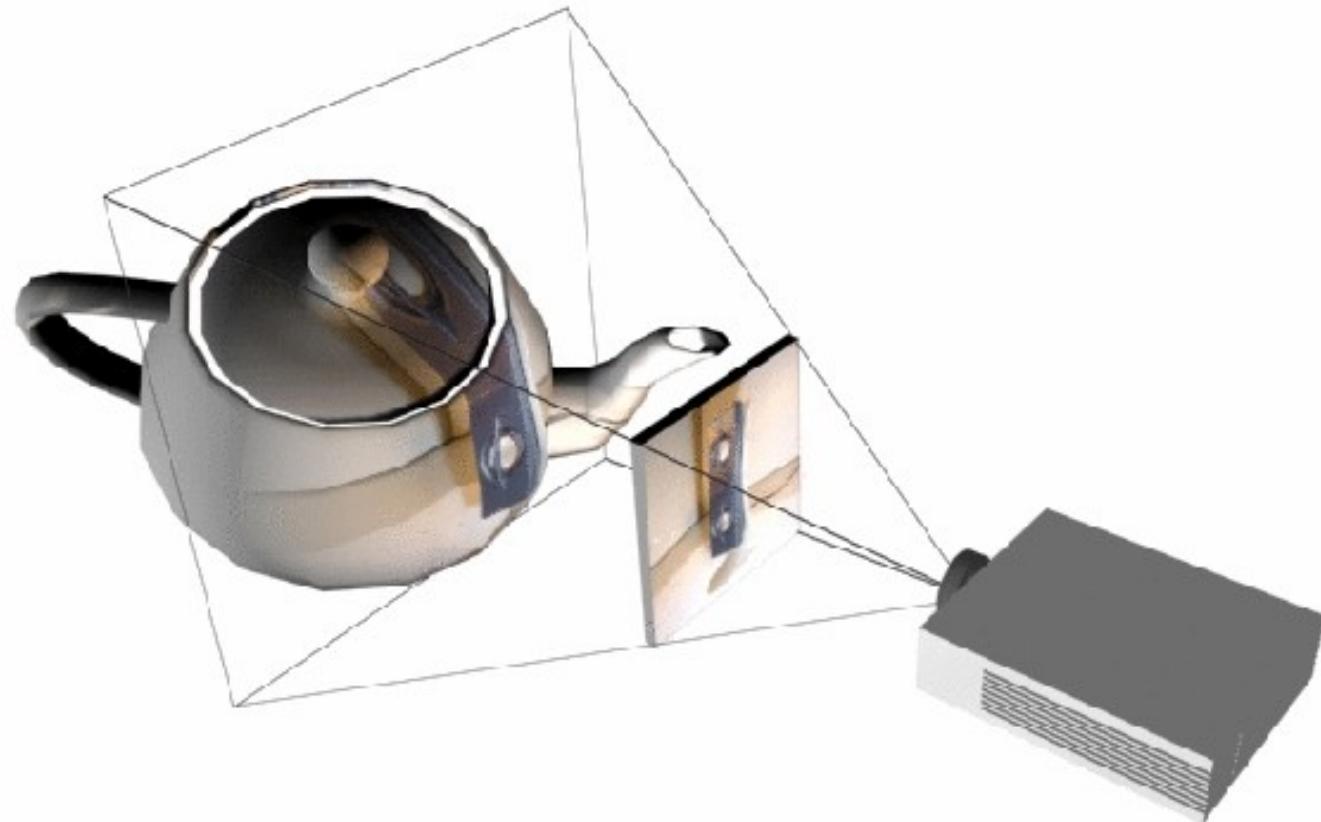

Scene Capture – continuous viewpoints

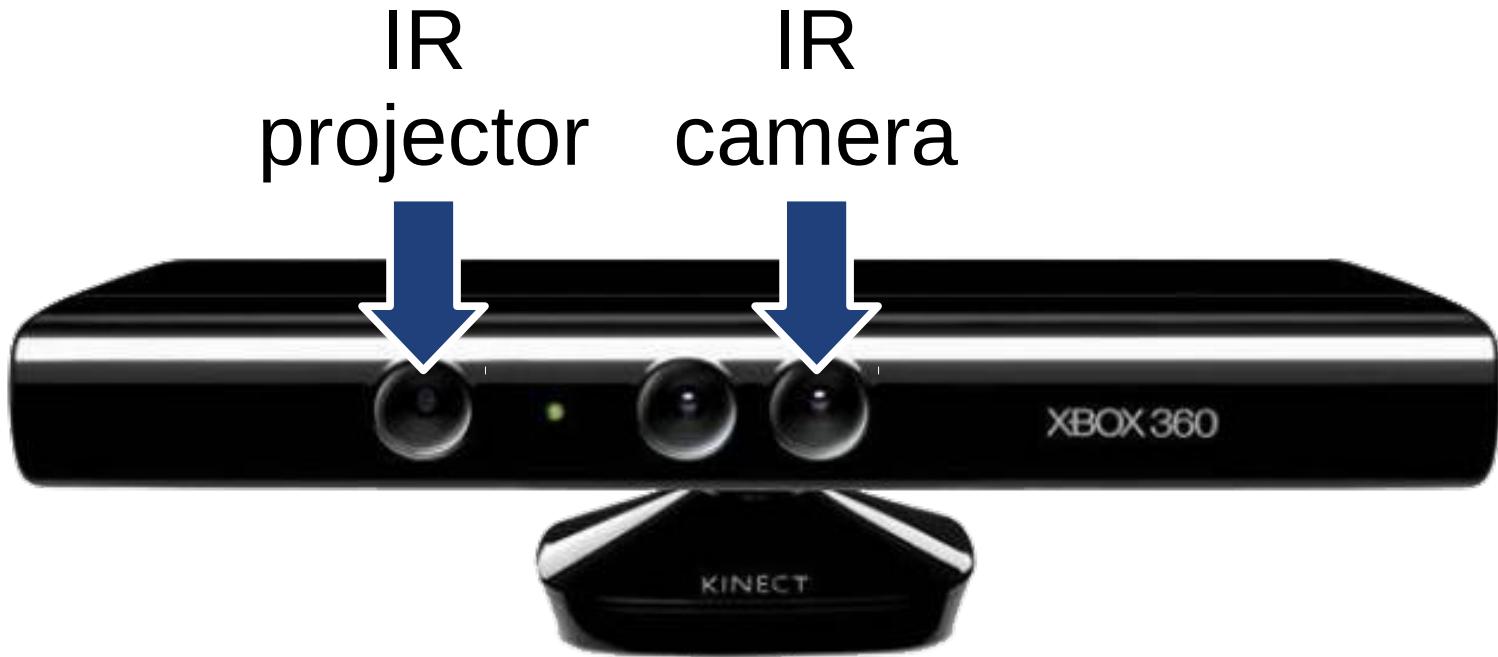

Scene Capture – 3D model

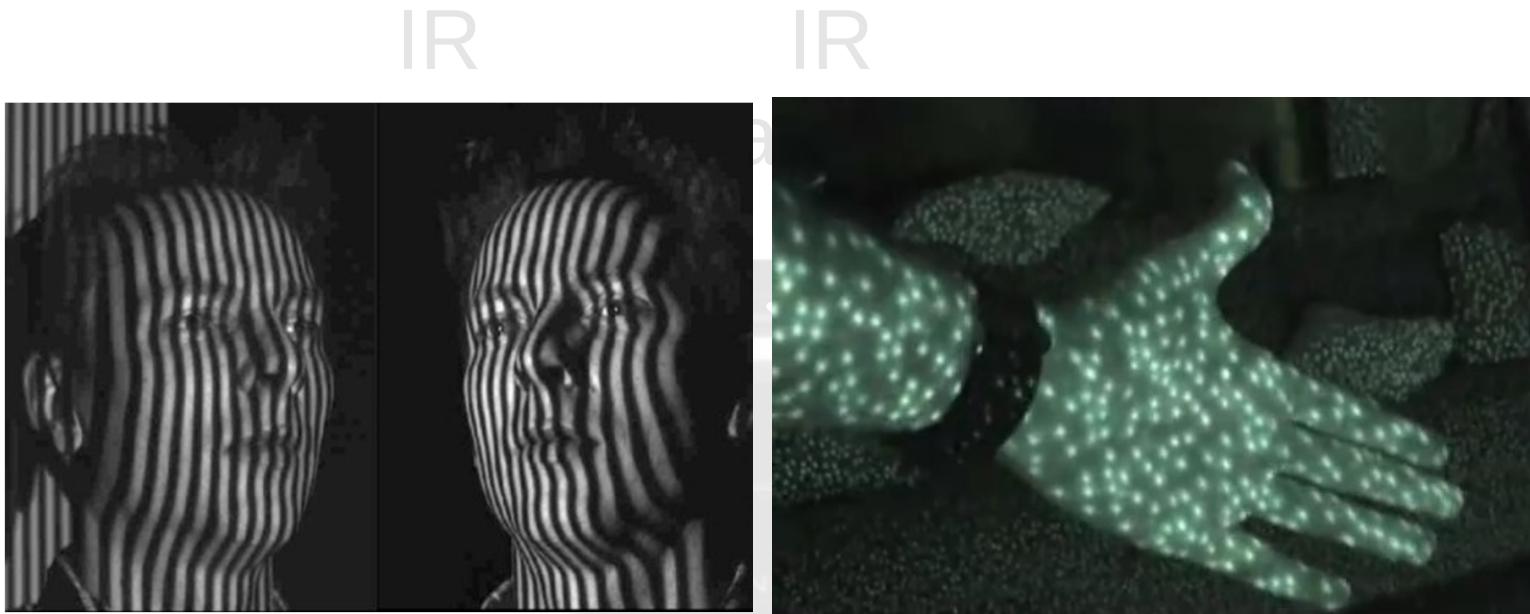

Scene Capture – projective textures

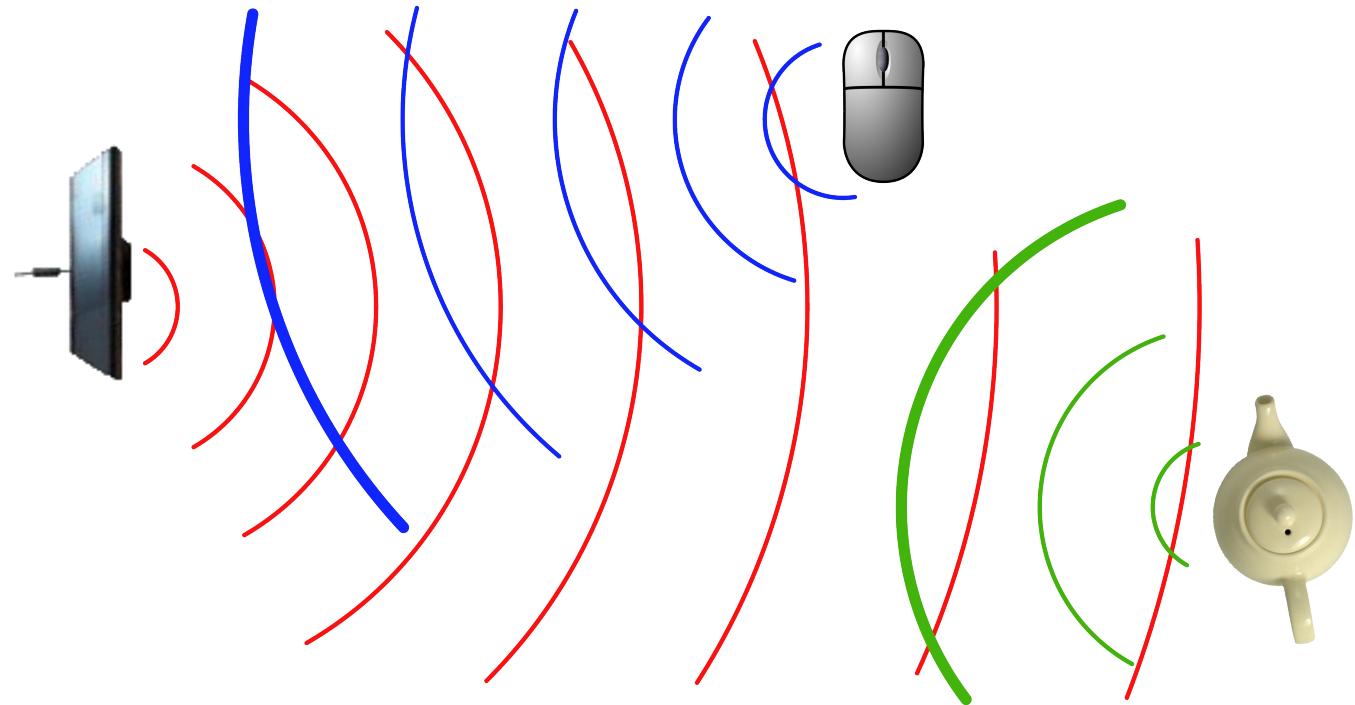

Depth sensor

Depth sensor – structured light

Depth sensor – time of flight

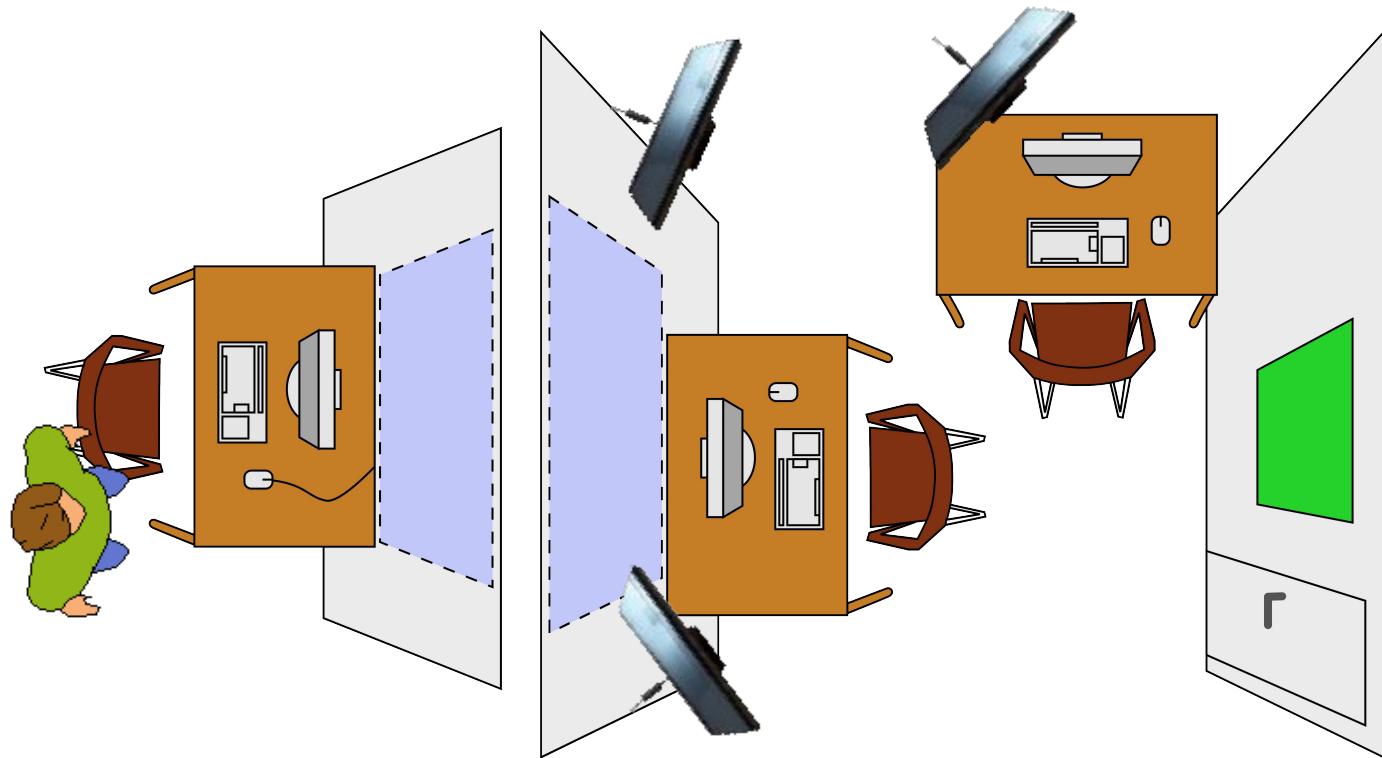

Depth sensor – result

[Maimone2012b]

Depth sensor – multiple sensors

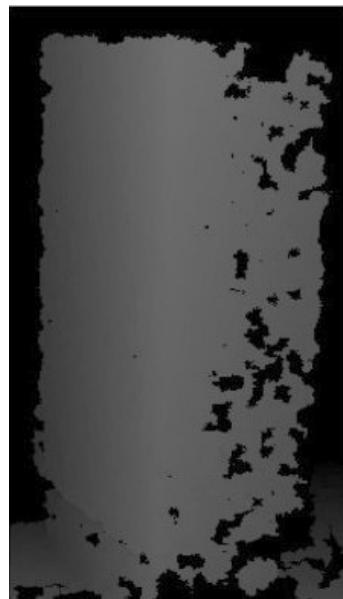

Depth sensor – interference

[Maimone2012a]

Depth sensor – interference

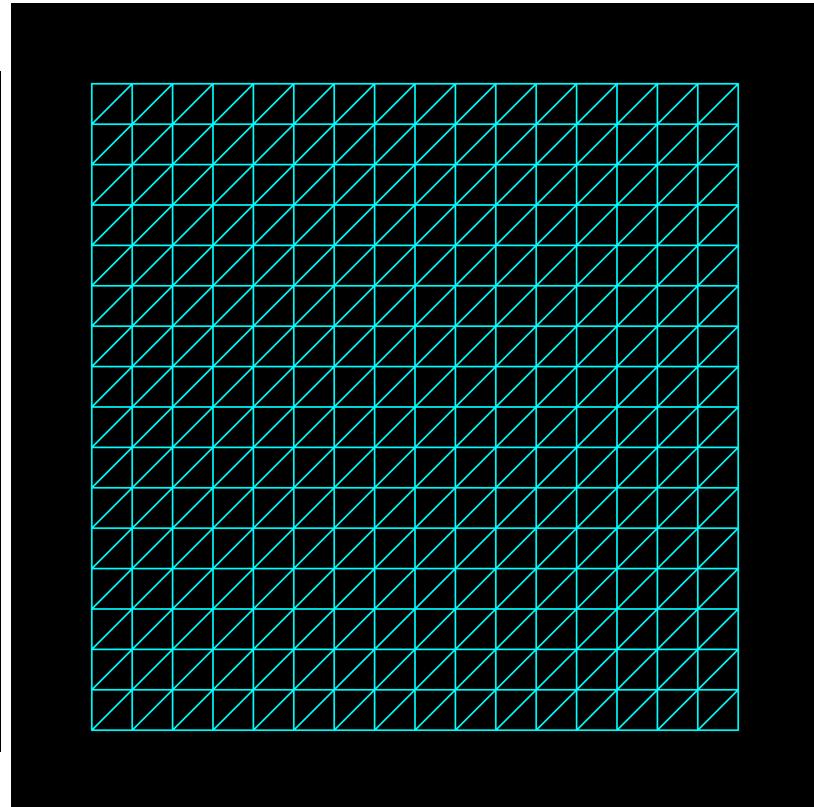

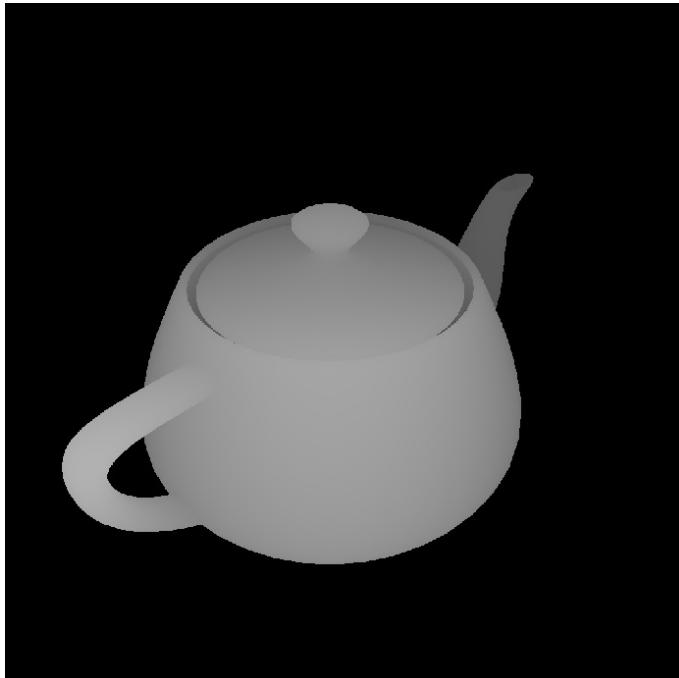

[Maimone2012a]

Depth sensor – interference

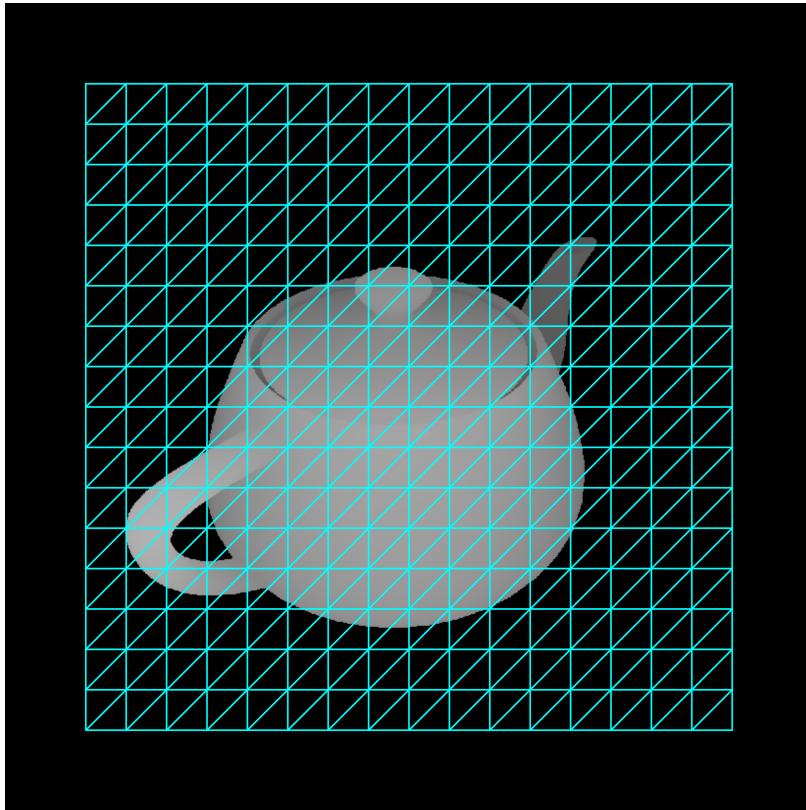

[Maimone2012a]

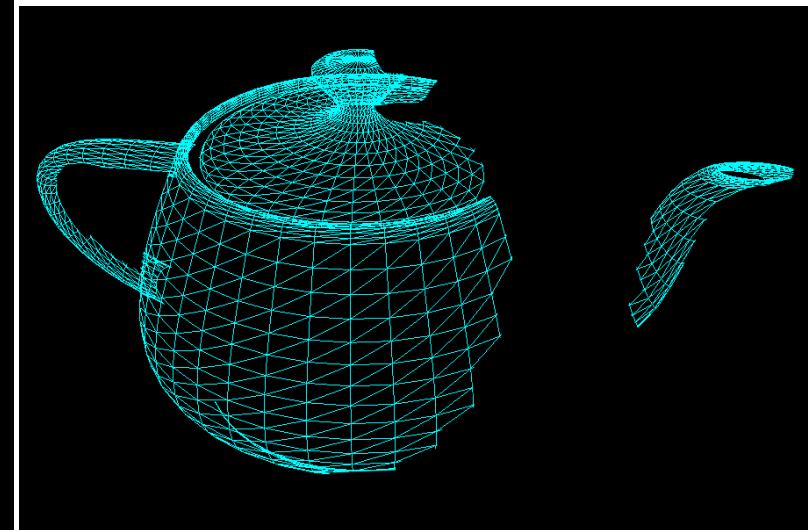

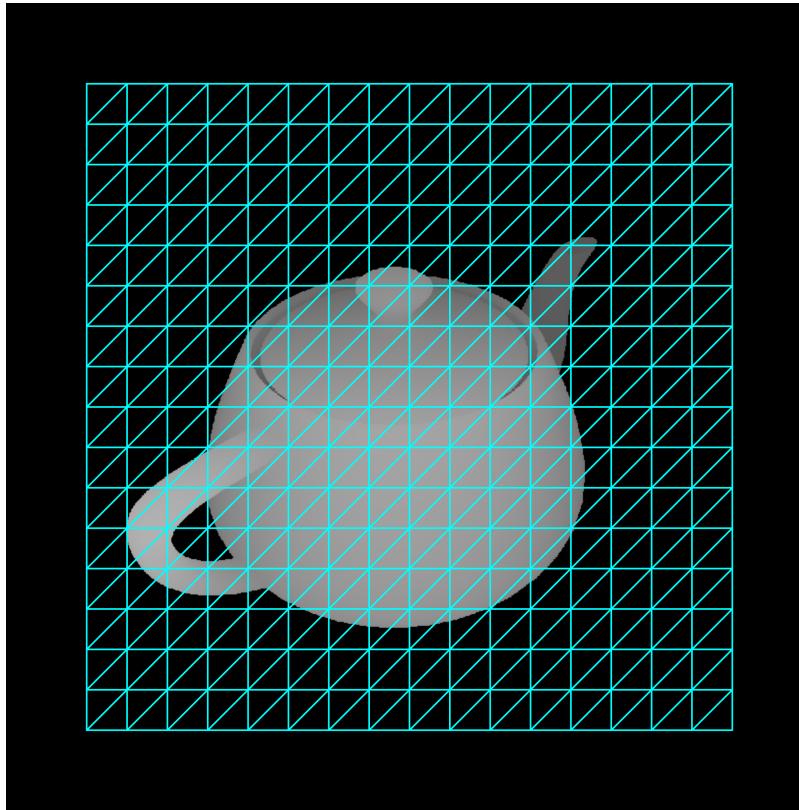

3D reconstruction

3D reconstruction

3D reconstruction

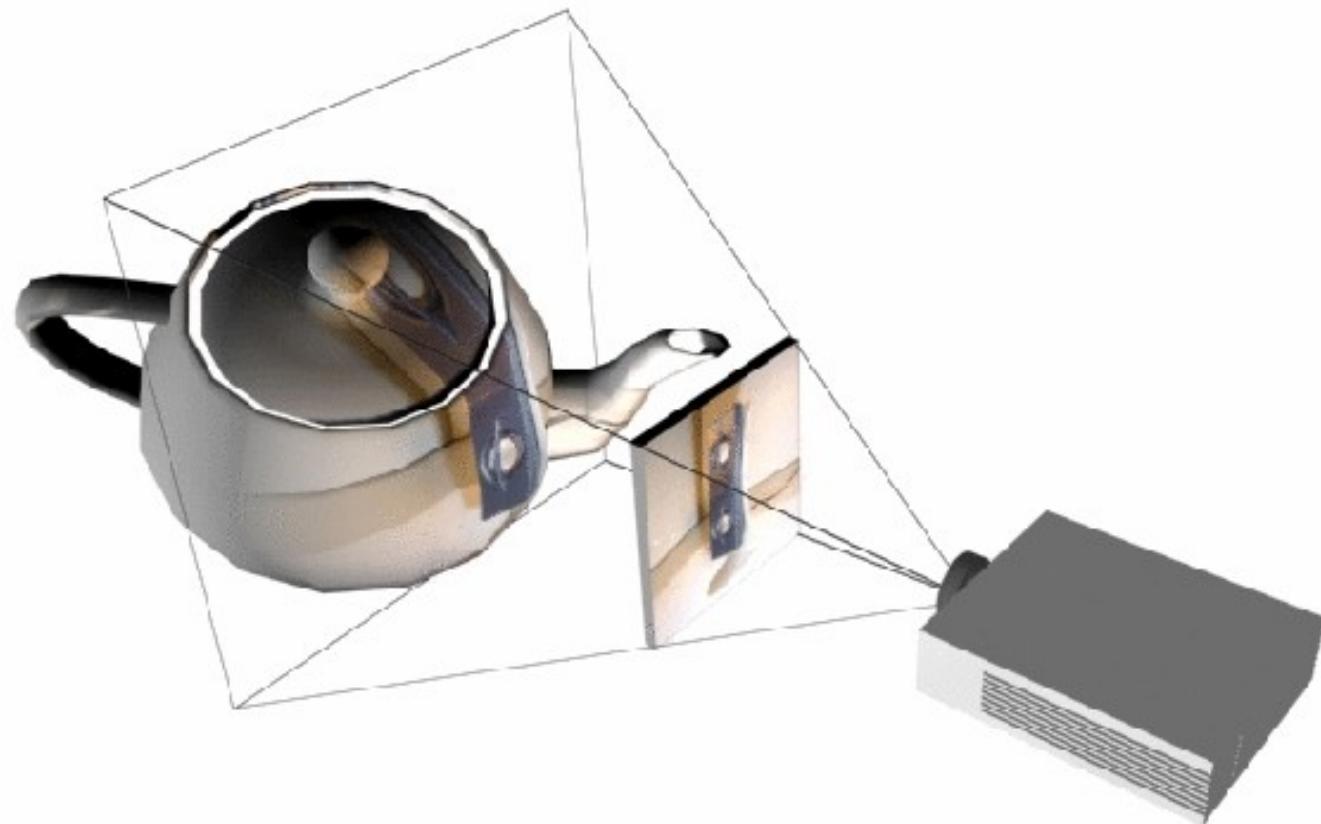

3D reconstruction – KinectFusion

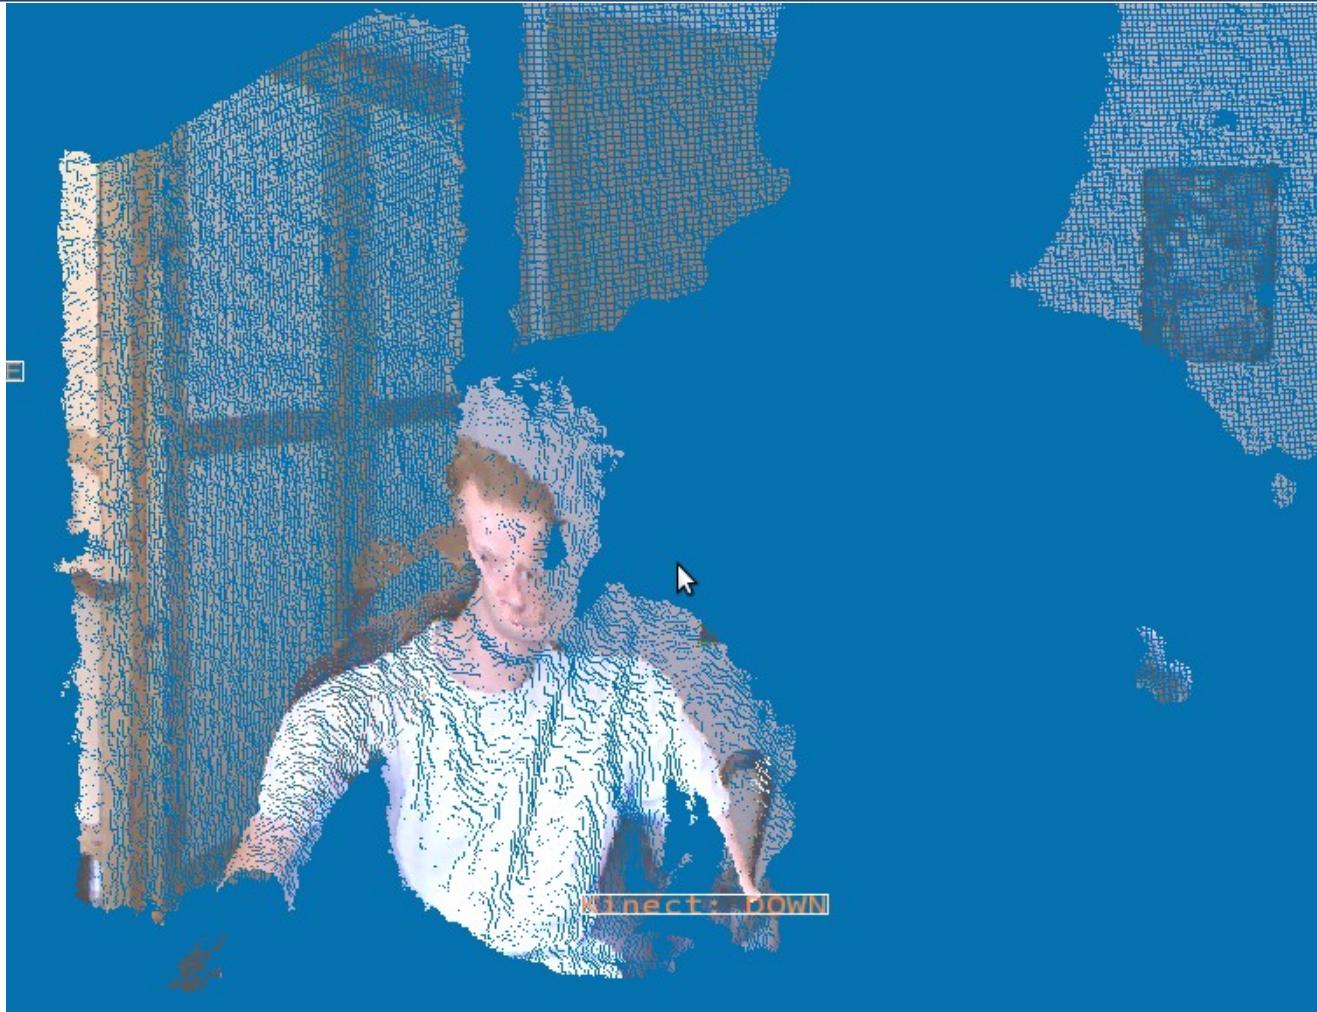

[Izadi2011]

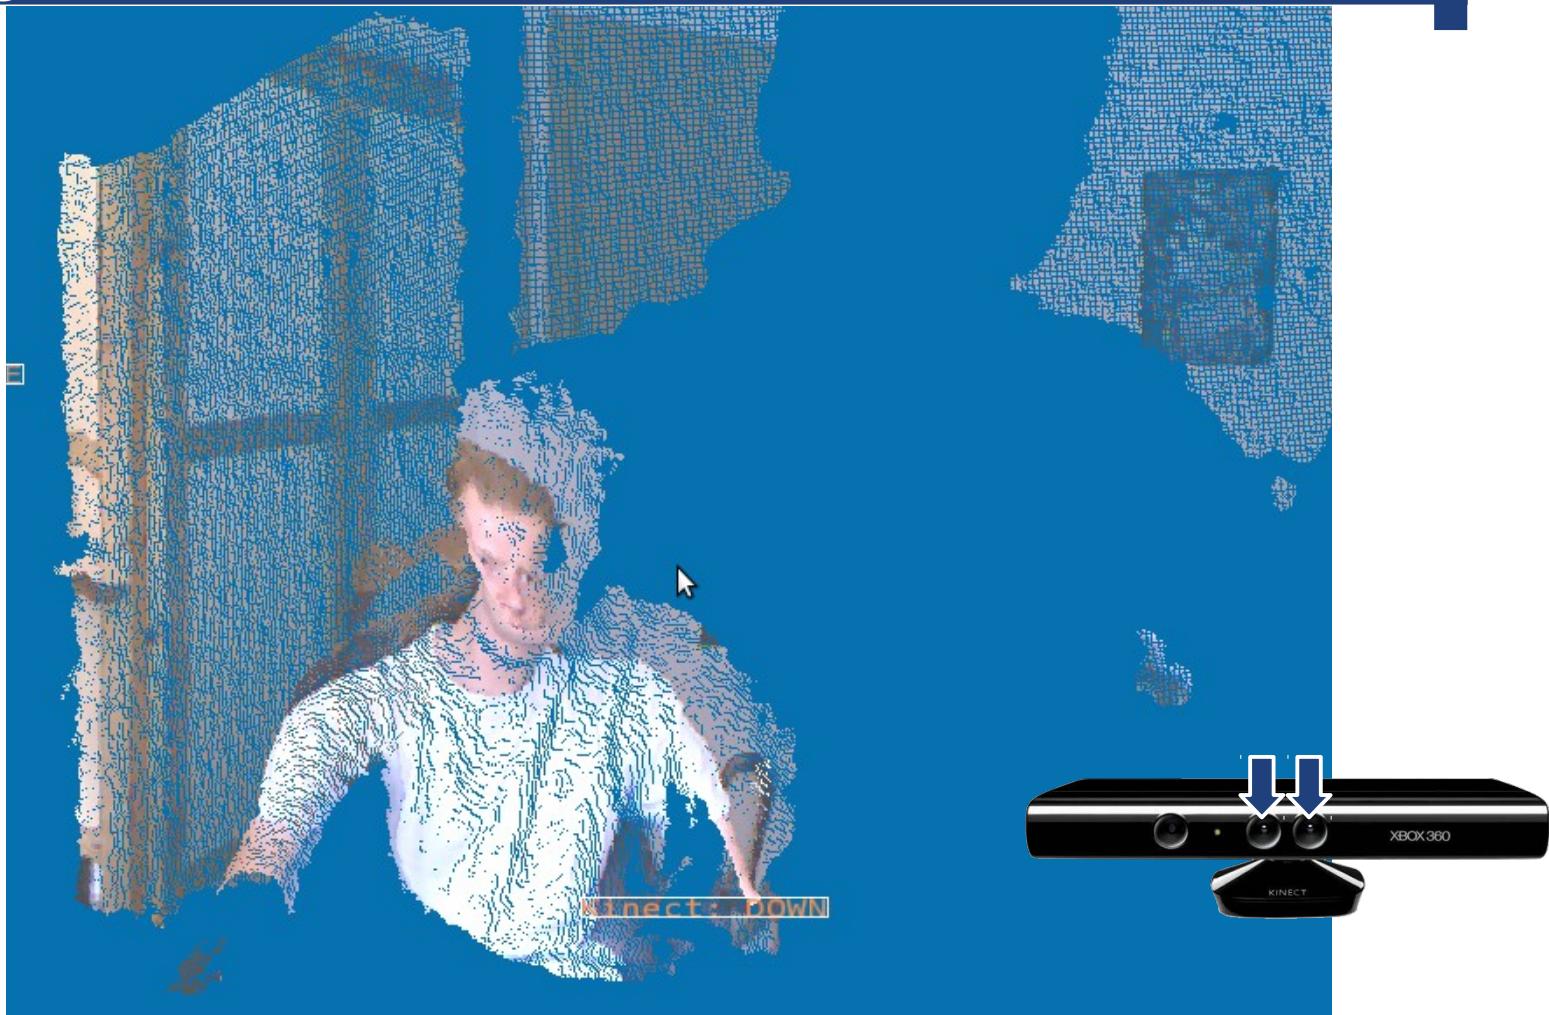

3D reconstruction

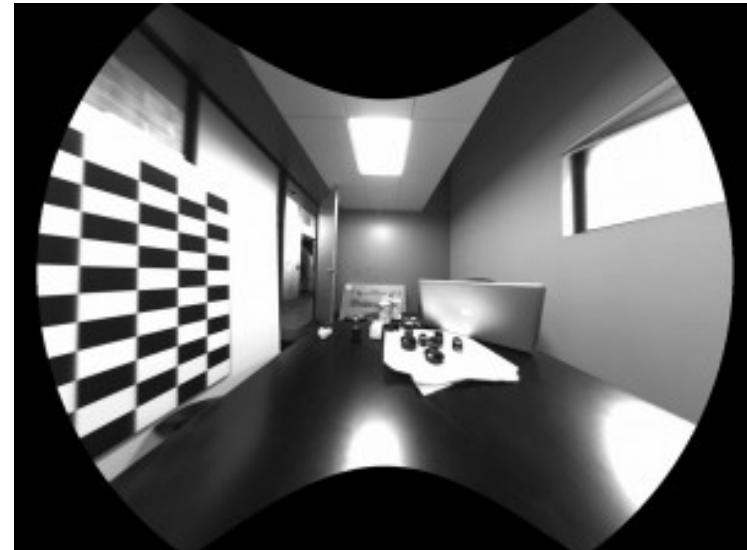

Registration – without calibration

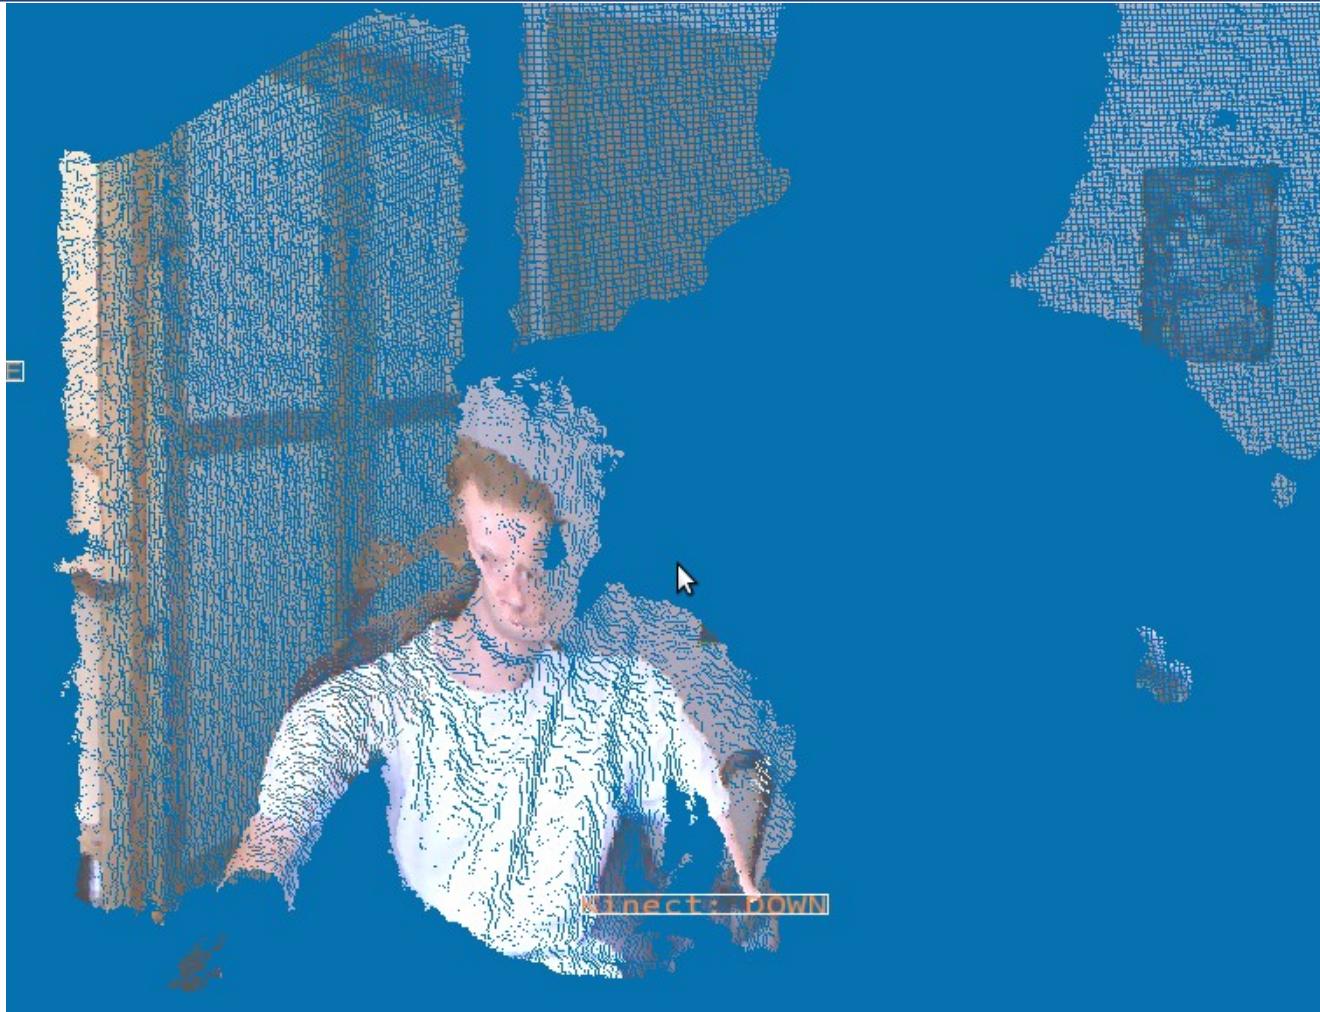

Registration – without calibration

Calibration – radial distortion

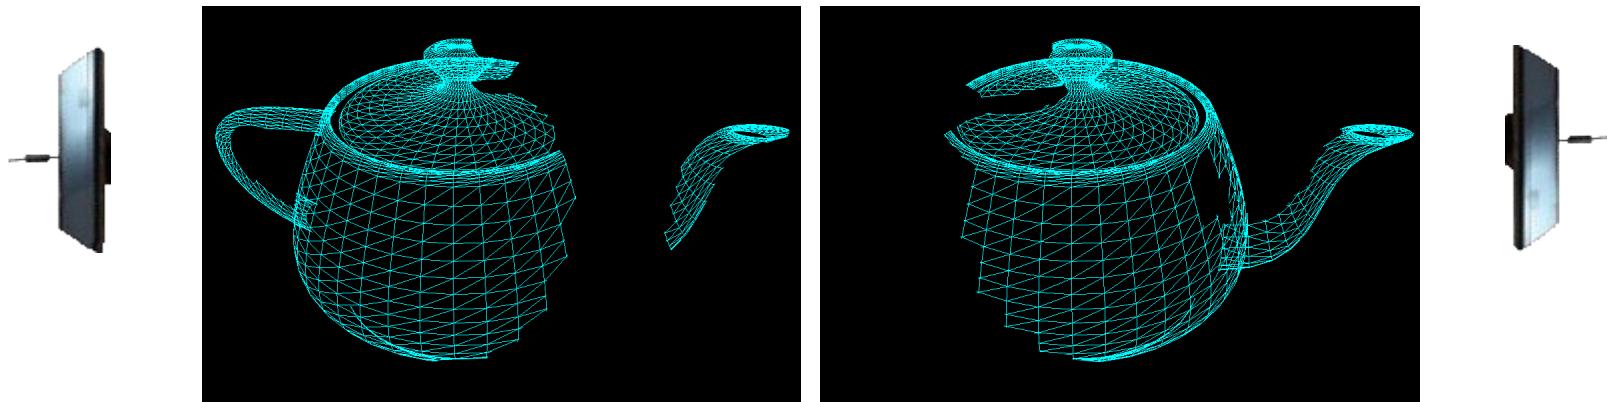

Calibration – extrinsic parameters

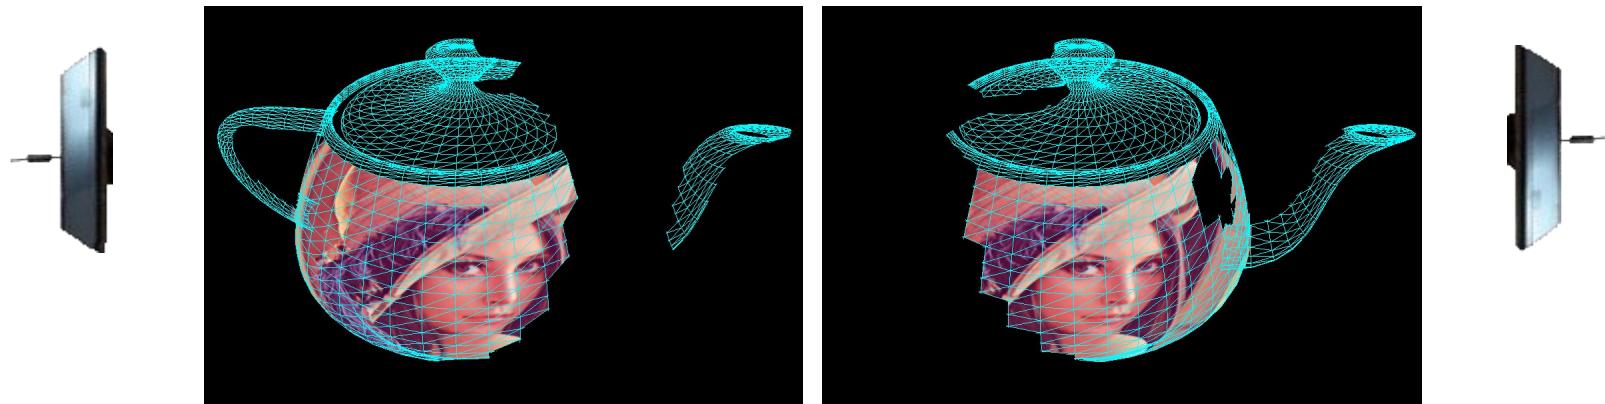

Calibration – extrinsic parameters

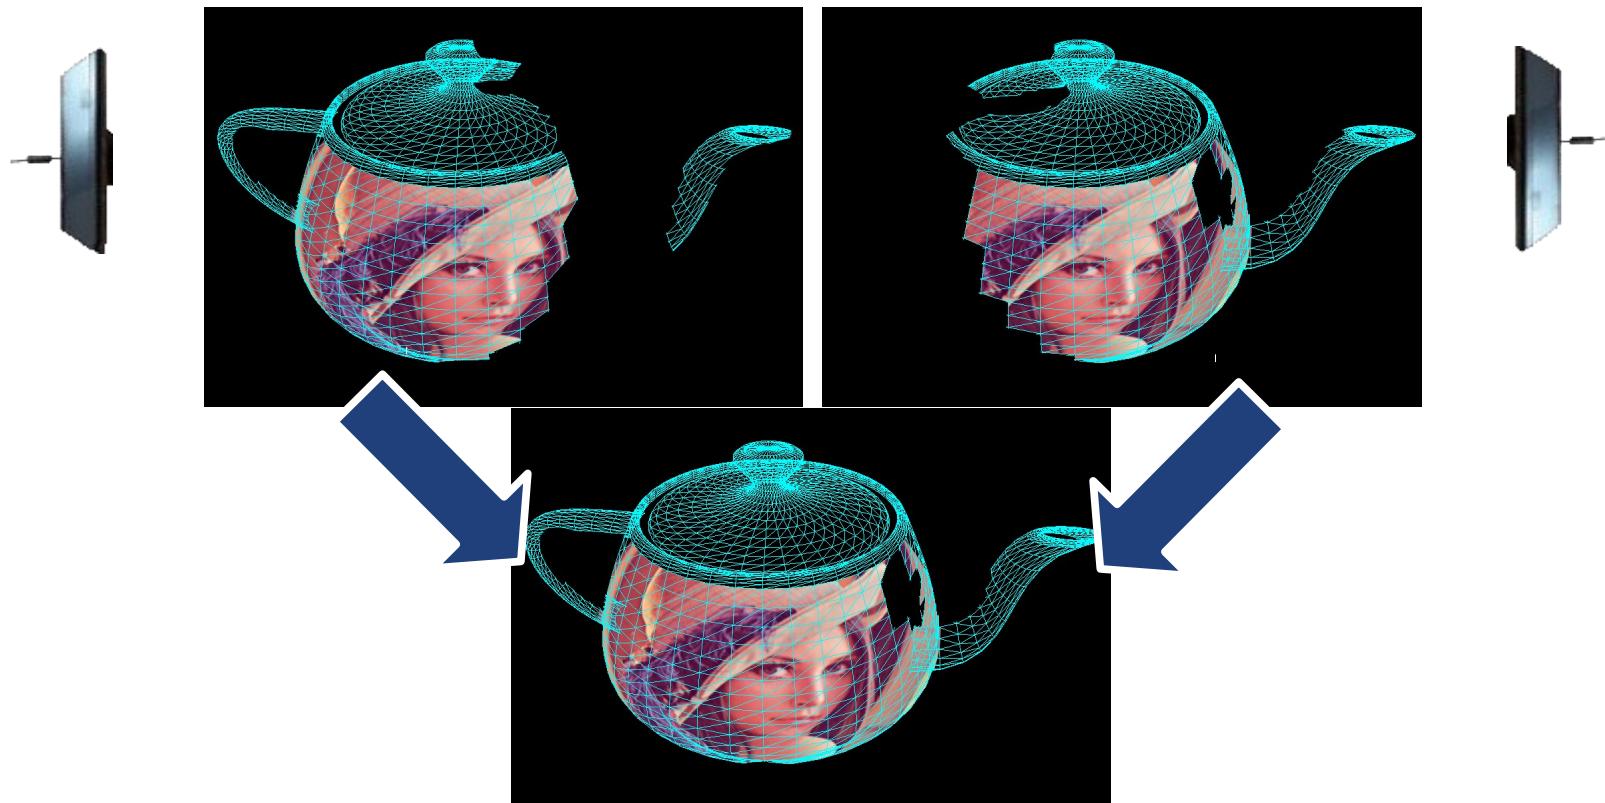

Registration

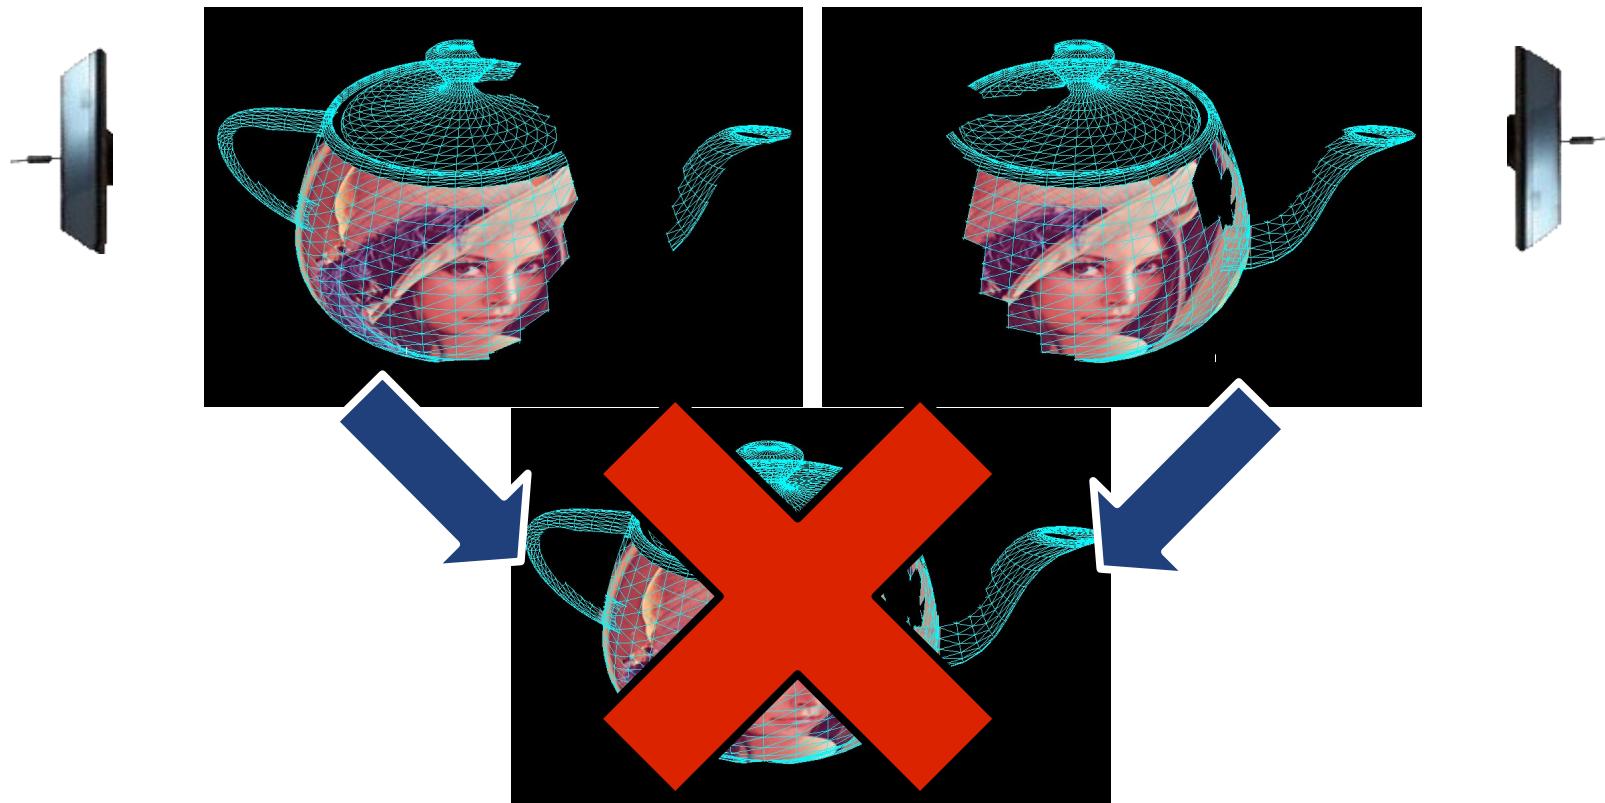

Registration

Registration

Registration

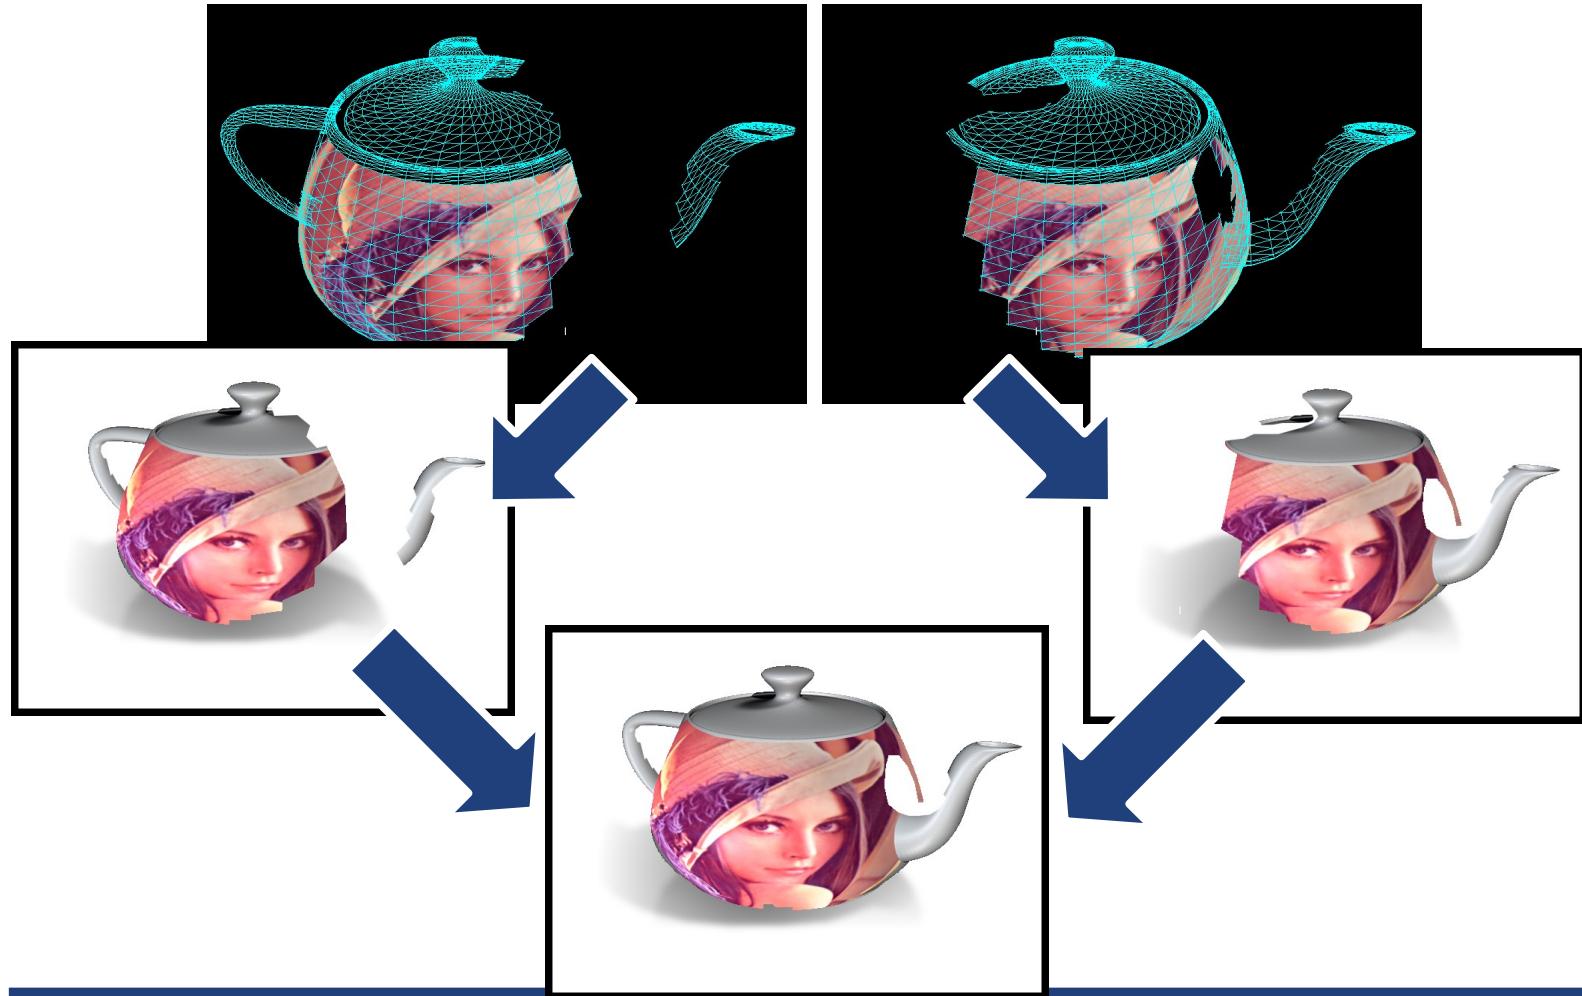

Registration

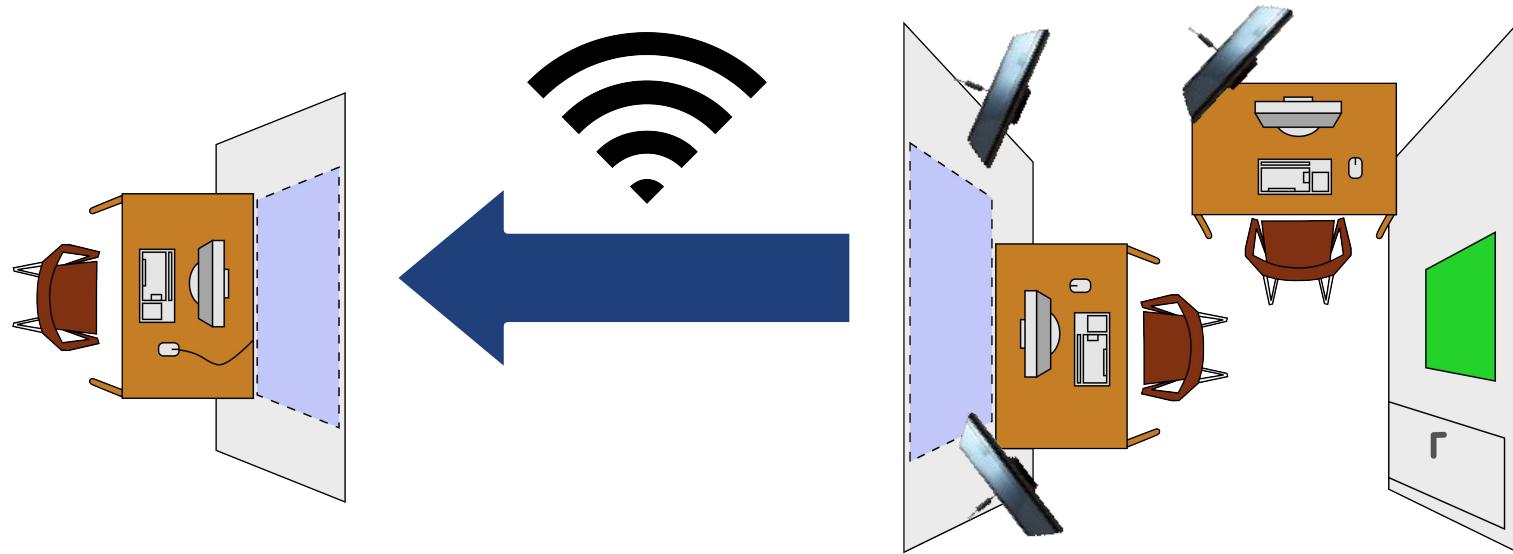

[Raskar1998]

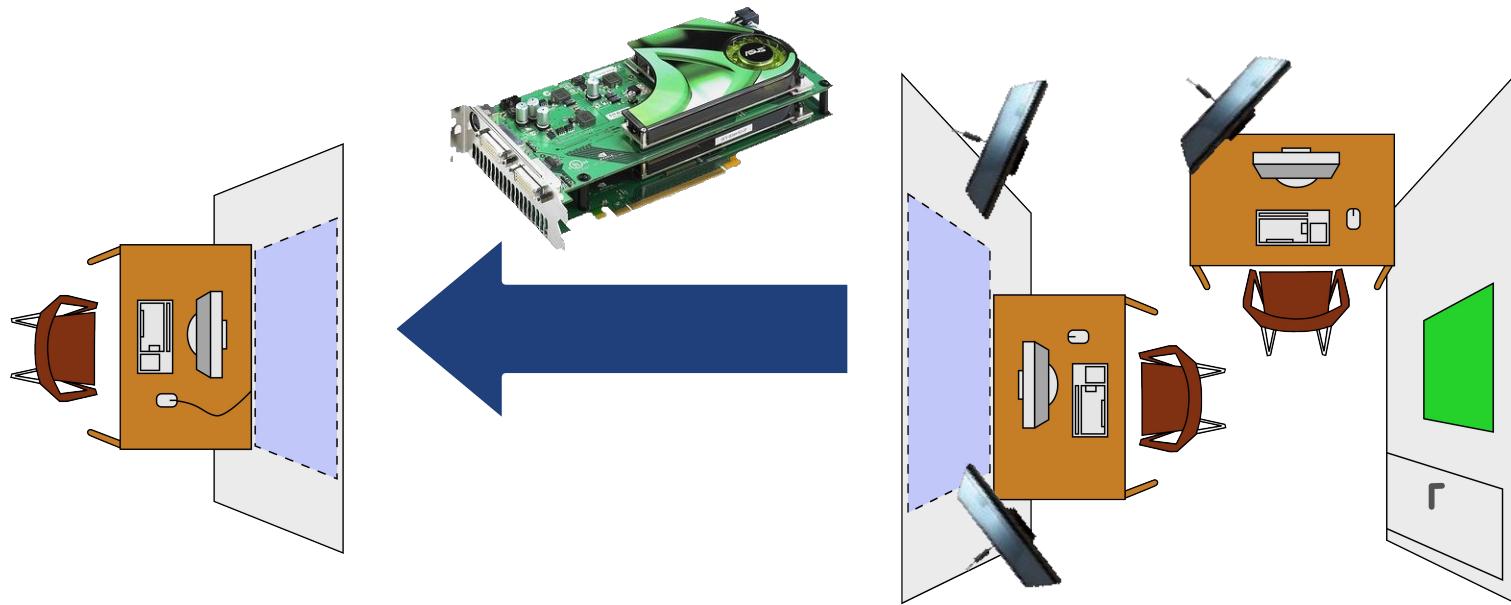

Registration – merging in 2D

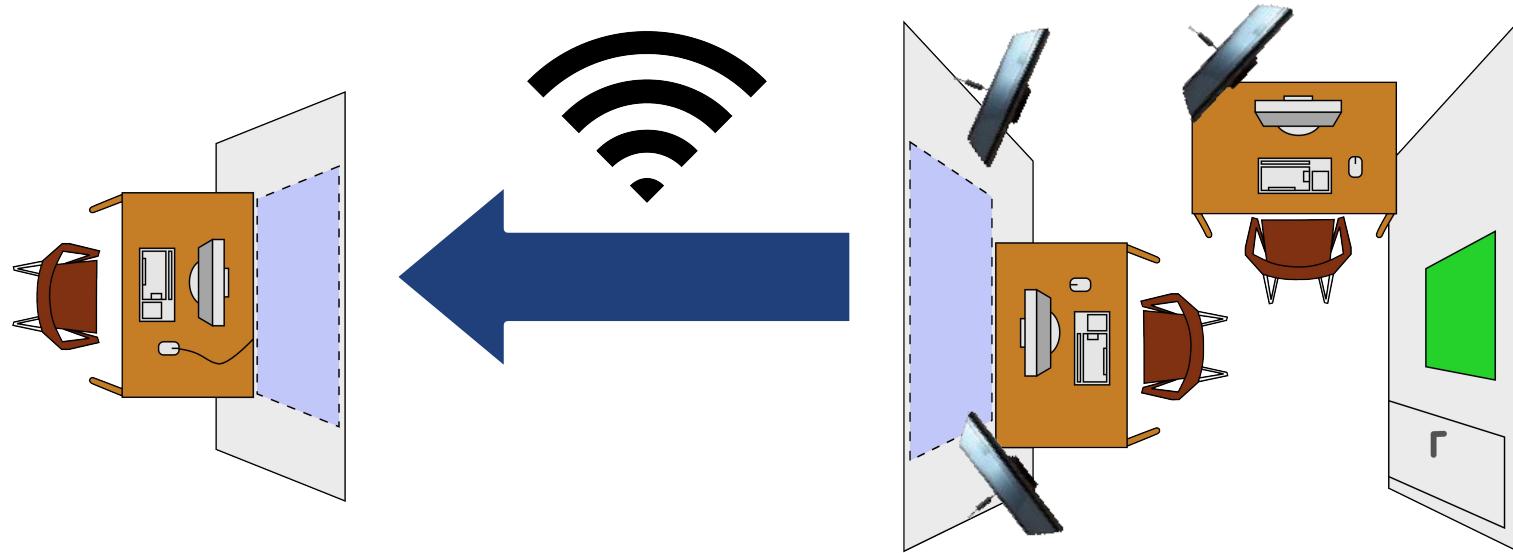

Transmission

Transmission

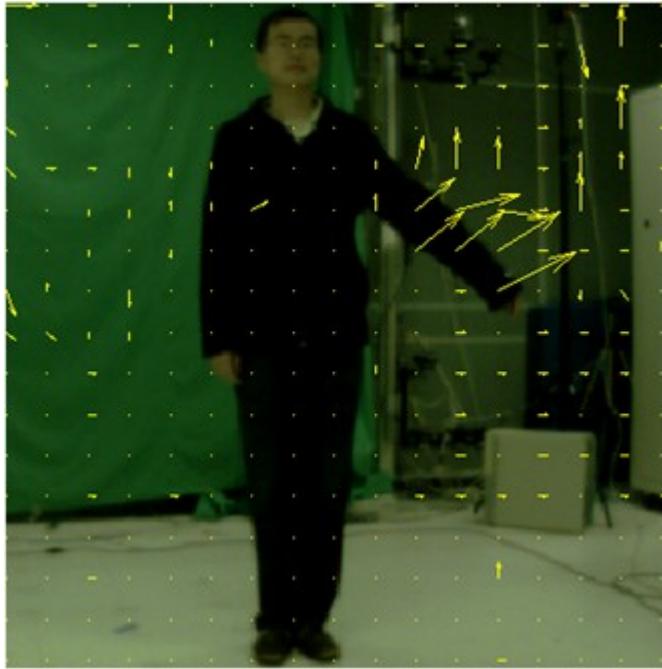

Transmission

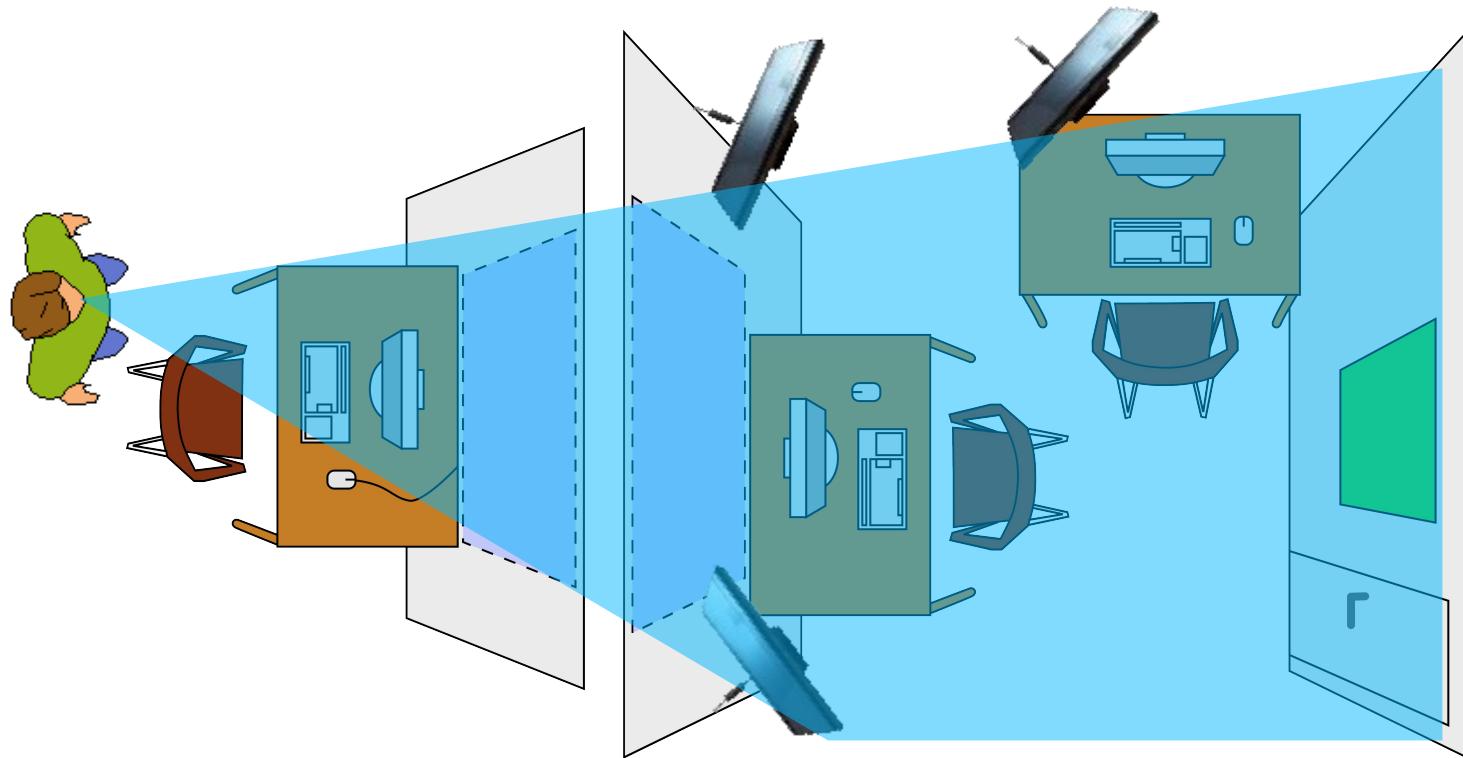

Transmission – optical flow

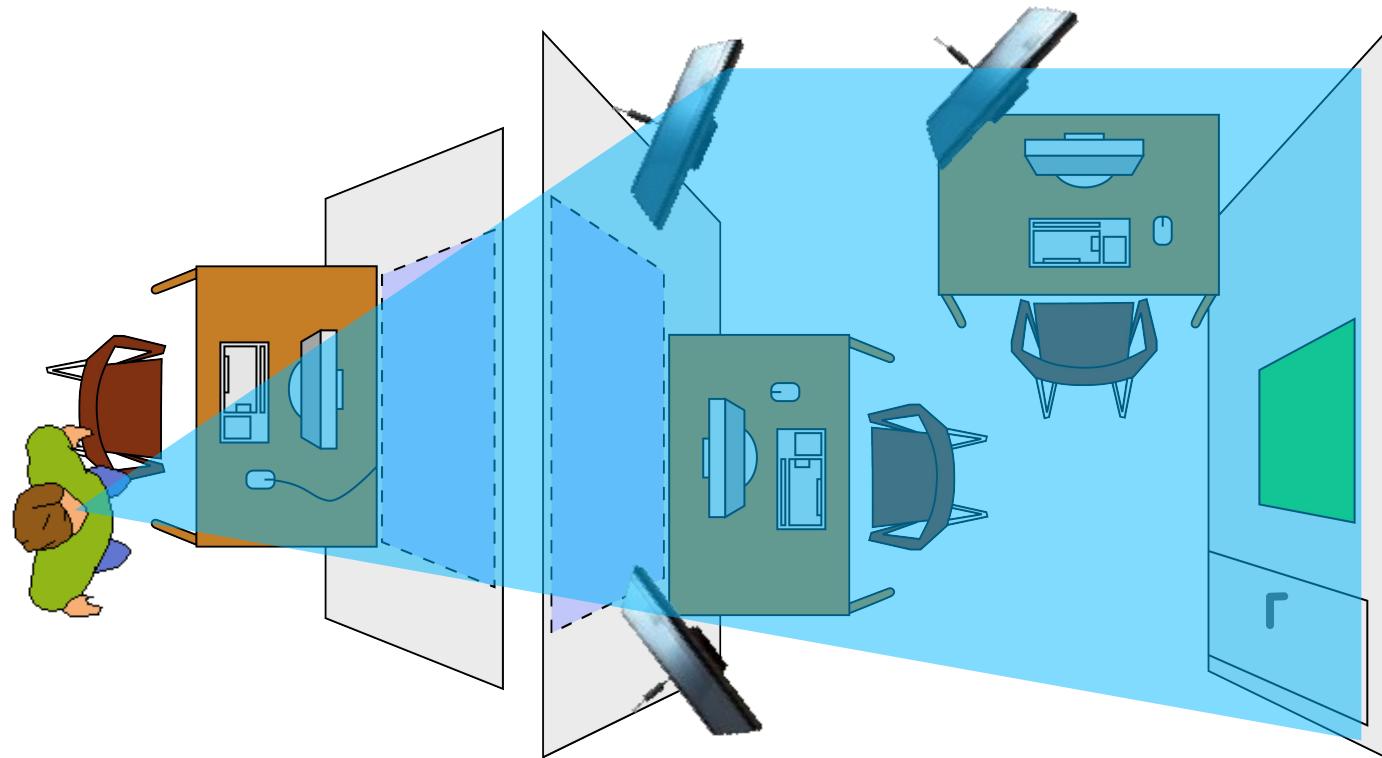

Optical flow applied to 3D models

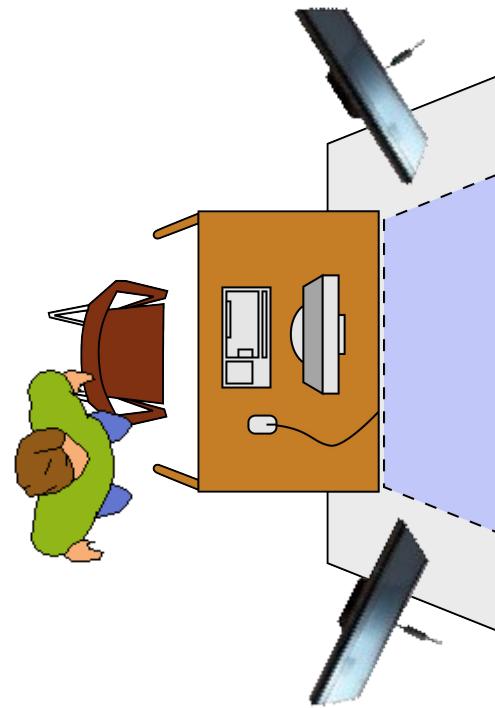

Rendering

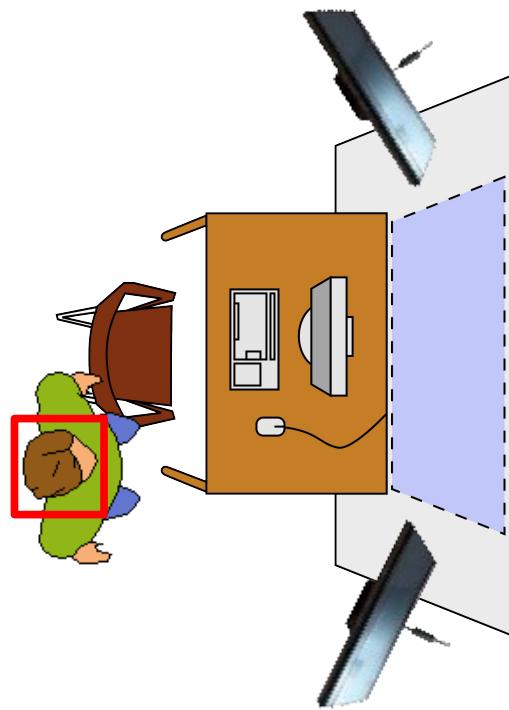

Rendering – viewpoint change

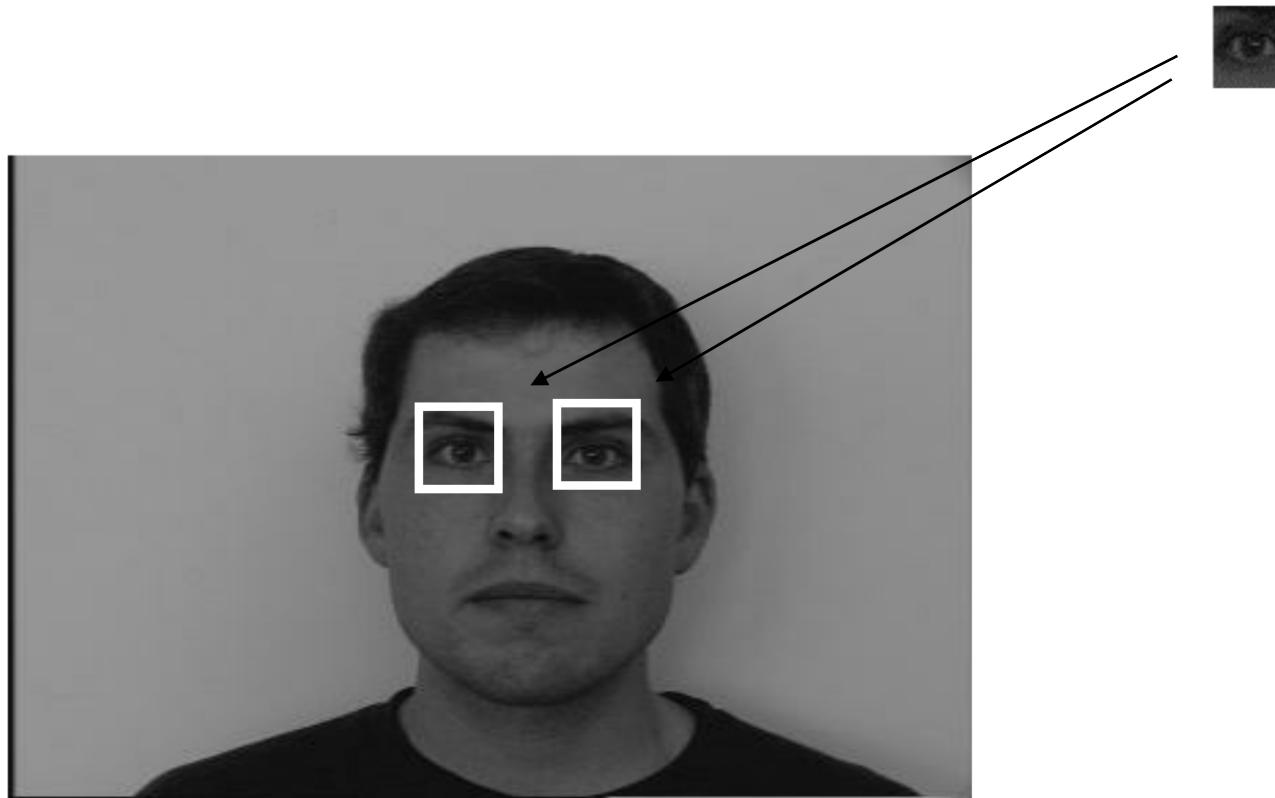

Rendering

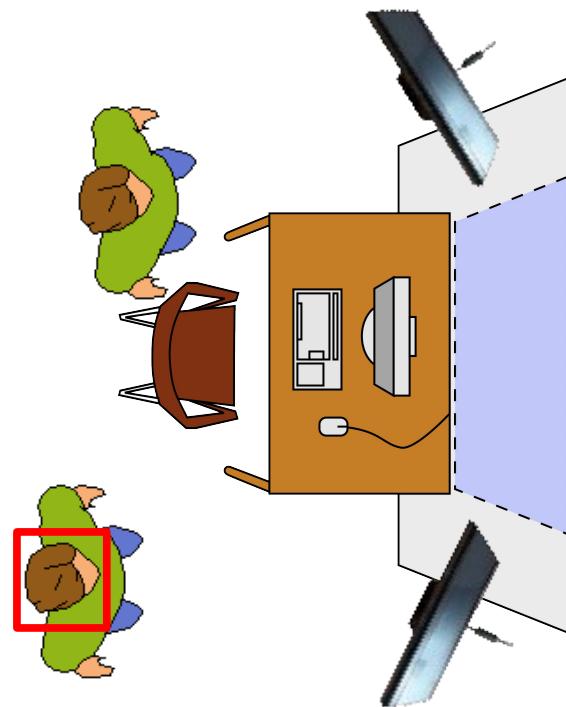

Rendering – head detection

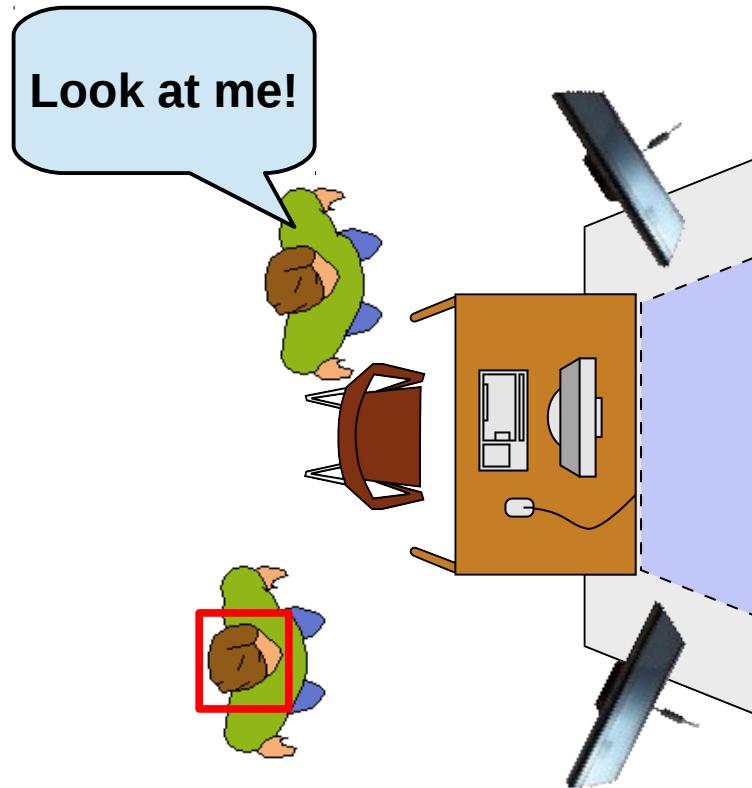

Rendering – template matching

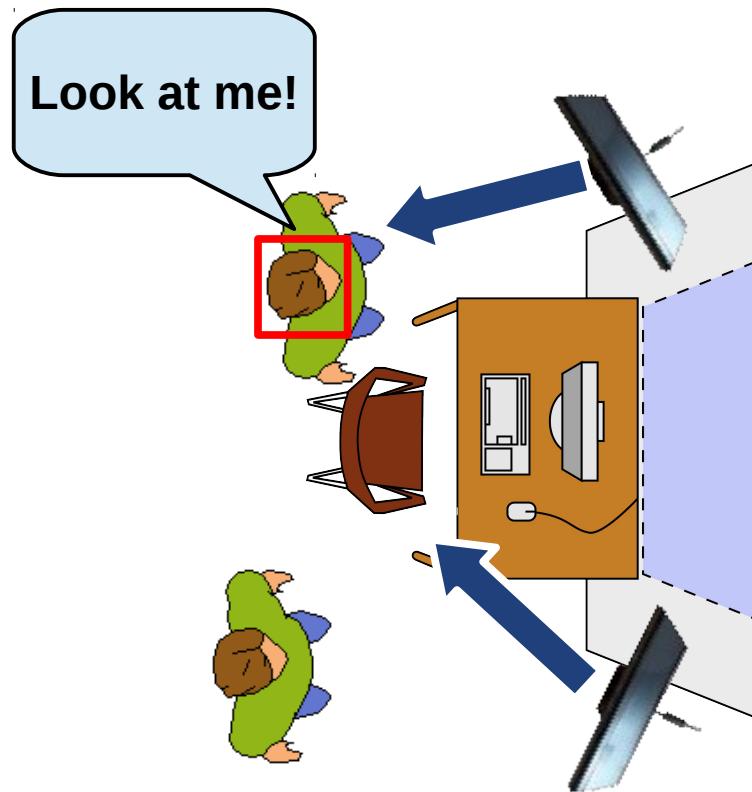

Rendering – multiple users

Rendering – multiple users

Rendering – multiple users

Projection

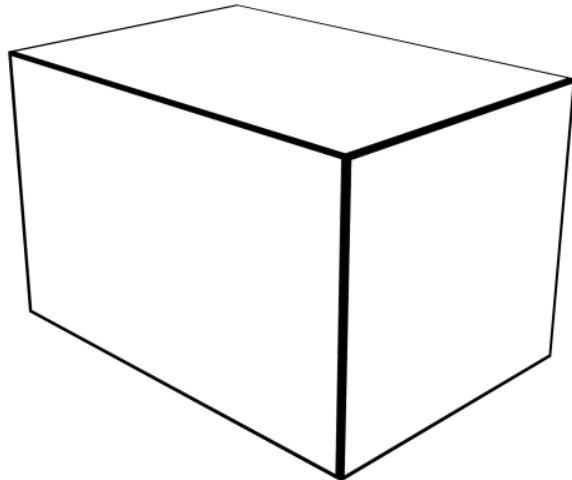

Projection

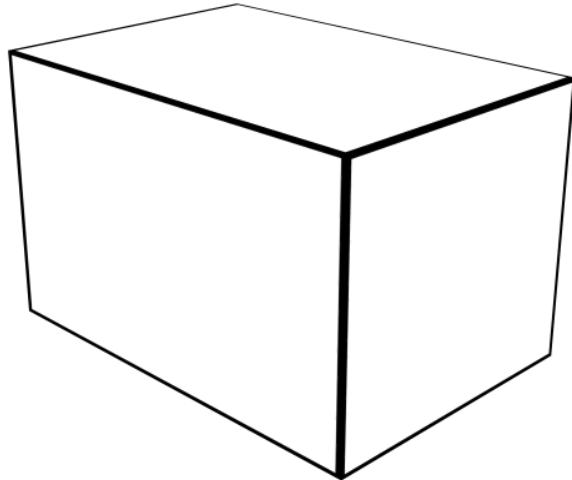

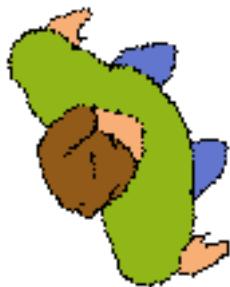

Projection

Projection – adapting to surface

Projection – adapting to surface

Projection – adapting to surface

Projection – adapting to surface

Projection – adapting to surface

Projection – adapting to surface

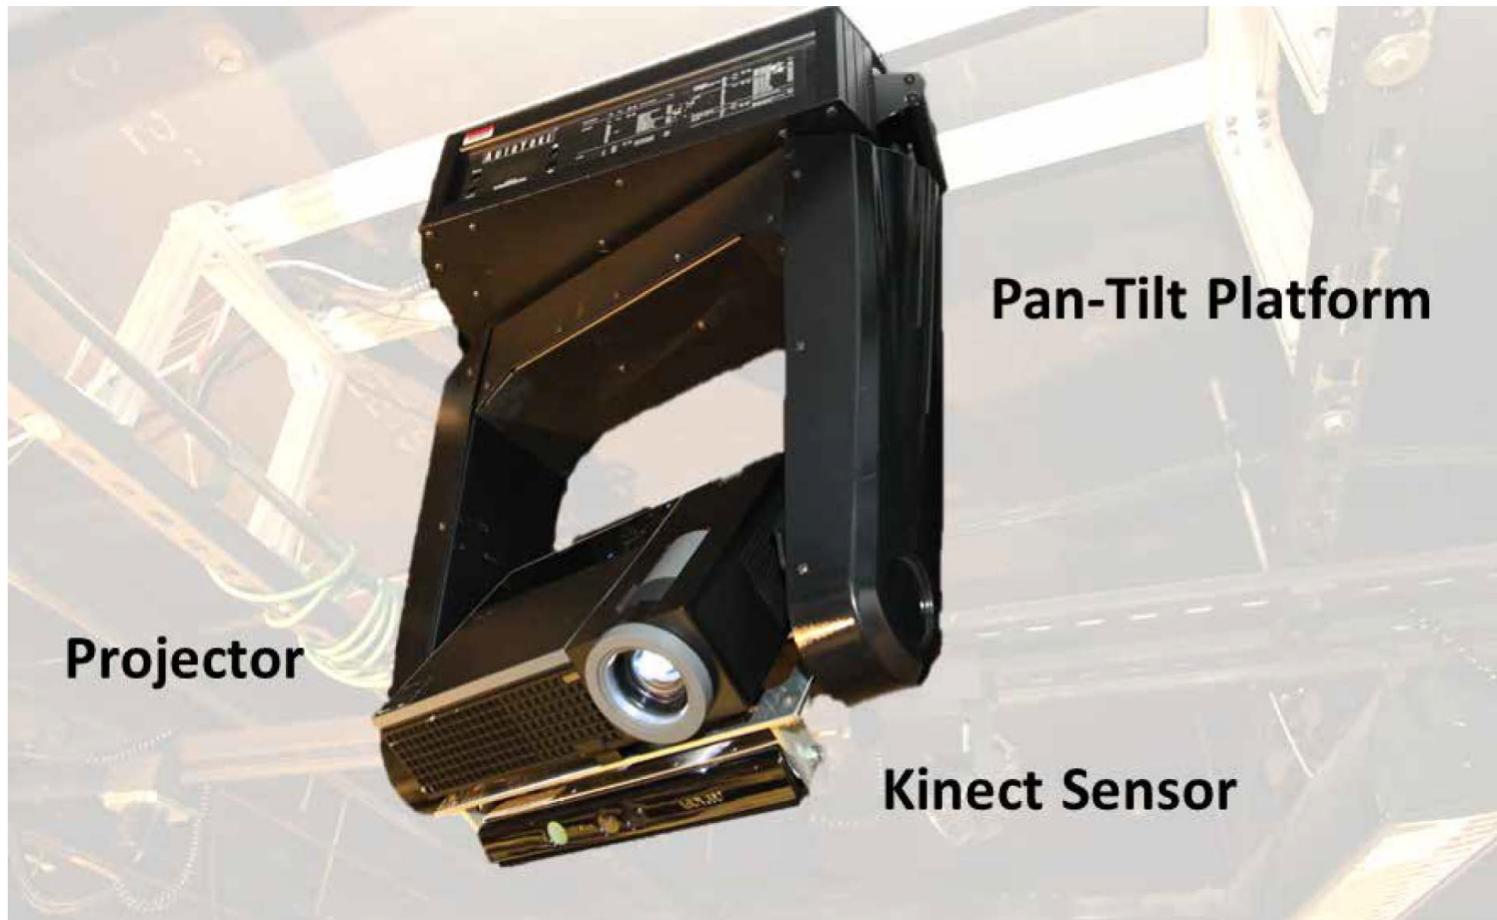

Implementations – MirageTable

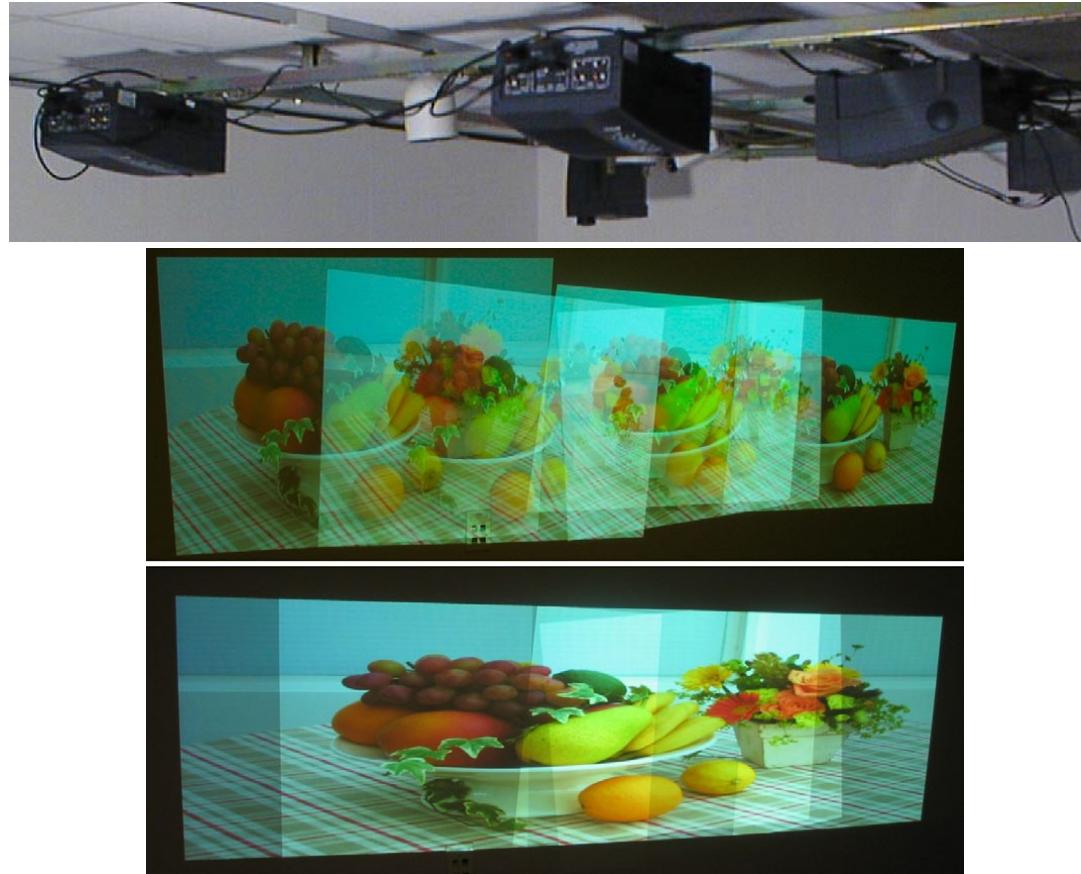

[Benko2012]; image from <http://www.engadget.com/>

Implementations – Beamatron

[Wilson2012]

Implementations – multiple projectors

[Raskar1998, Raskar2003]

Implementations – autostereoscopic display

[Maimone2012a]; image from <http://www.shortcourses.com/>

Conclusion

[Raskar1998]

Thank you!
