

Ubiwise Ubicomp Simulator

Conceptualizer

John J. Barton HP Labs

Vikram Vijayaraghavan, Stanford

Ubiwise Ubicomp Simulator:

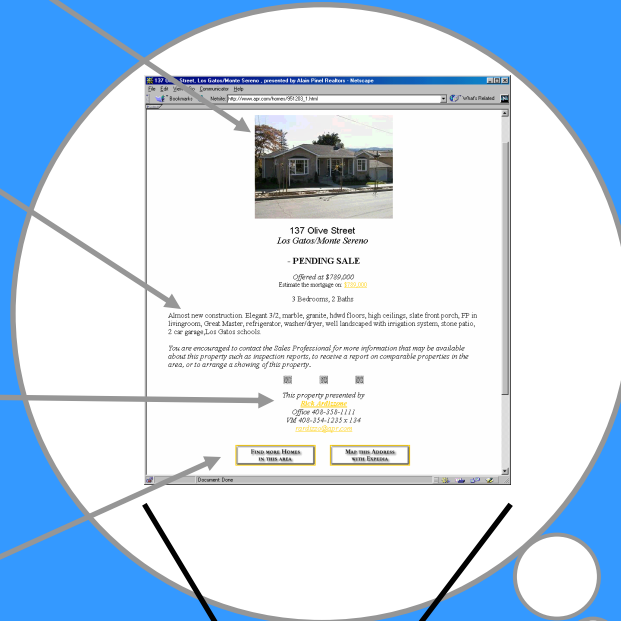

Problems with Physical prototypes

- Construction Difficult
 - 1 Device per on research group per year
 - Rarely iterate on design
- Little work on communications
 - Device/device or device/service
- Irreproducible
 - Demo hardware vanishes.
- Many issues ignored or poorly studied
 - Context, services, environment, etc

Services for wireless handheld appliances
...but you don't have any...

- Plan A: whine about it
 - Work on services; wait for appliances

Appliance Data Services

Links and Forms
Summary
as Input UI

IPO_RealEstate.com

But there are no wireless handheld devices

- Plan A: whine about it
 - Work on services; wait for appliances
- Plan B: Hack one
 - Hardware, device drivers, ...

BadgePAD4

Newest Context Aware Platform

- ◆ Biometrics, esp imaging sensors
- ◆ Diverse Context Sensors
- ◆ Audio Processing, esp speech, noise cancellation and streaming audio
- ◆ Video Streaming, esp wireless
- ◆ Wireless Systems, can support 4G and new comm modalities ie VoIP
- ◆ Power optimization, supports measurements, core scaling and adaptive power policy generation

GLAD: Glimmer/Linux Access Device

But there are no wireless handheld devices

- Plan A: whine about it
 - Work on services; wait for appliances
- Plan B: Hack one
 - Hardware, device drivers, ...
- Plan C: Build one
 - See Plan B.
- Plan D: Fake one
 - Gee this is easy....Ubiwise is born!

Ubiwise Design Goals

- Ease of Design
 - Java Toolkit, Scenario Editors ← *progress*
- Communications focus
 - Protocol development framework ← *idea*
- Reproducible
 - Record/playback; update strategy ← *some*
- Open research tool
 - Available, open source (LGPL) ← *progress*

Build up a library of devices

Handheld

Fixed

Build up a library of Places

Downtown

Museum ✓

Conference room

Bus

Classroom Home Store

Build up a library of communications protocols

✓
802.11

Physical
Media.

3G

Bluetooth

Build up a library of ubicomp services

- Web Presence, WebID, CC/PP,...
- Event Heap, Icraft,...
- Gaia, Context Toolkit, ...

Explore the combinations

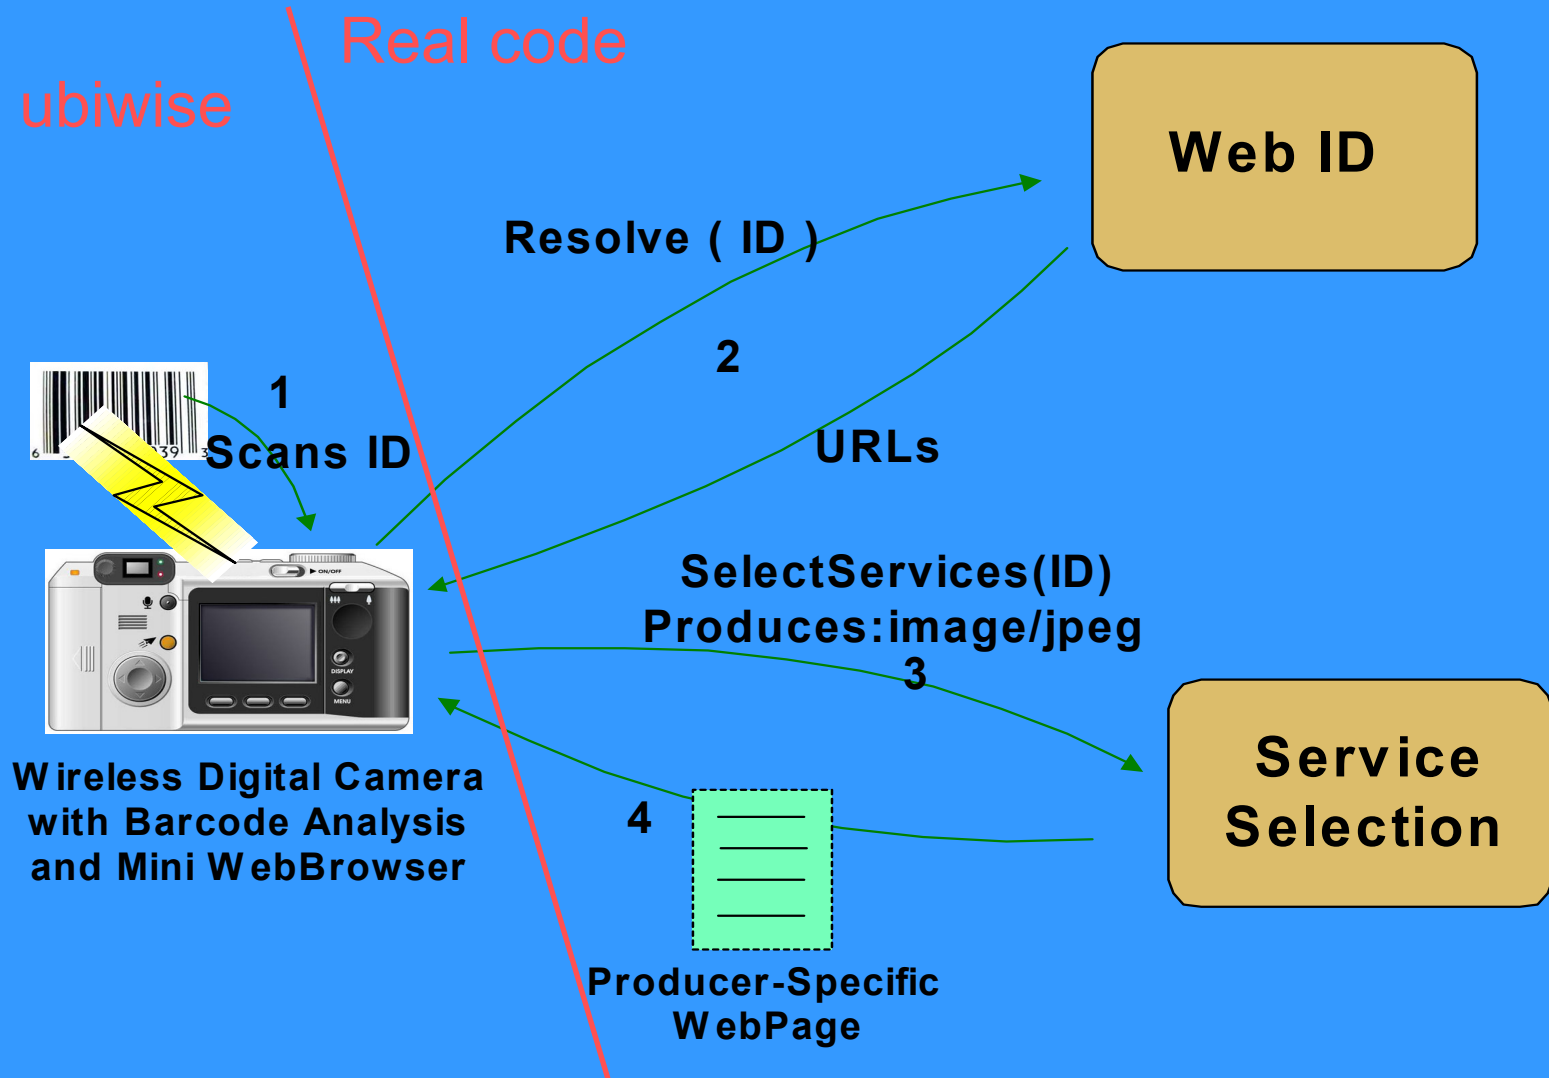

- Combine devices
 - Camera+barcode+rfid+compass+gps+802.11a+
- Combine a prototype device+world simulated
 - Wireless camera prototype, fake digiframe
- Combine two ubicomp systems
 - *iroom* and *cooltown*
 - *Gaia* and *oxygen*
- Combine subsystems
 - RADAR+Websign+WebId= ?

Ubiwise Evaluation

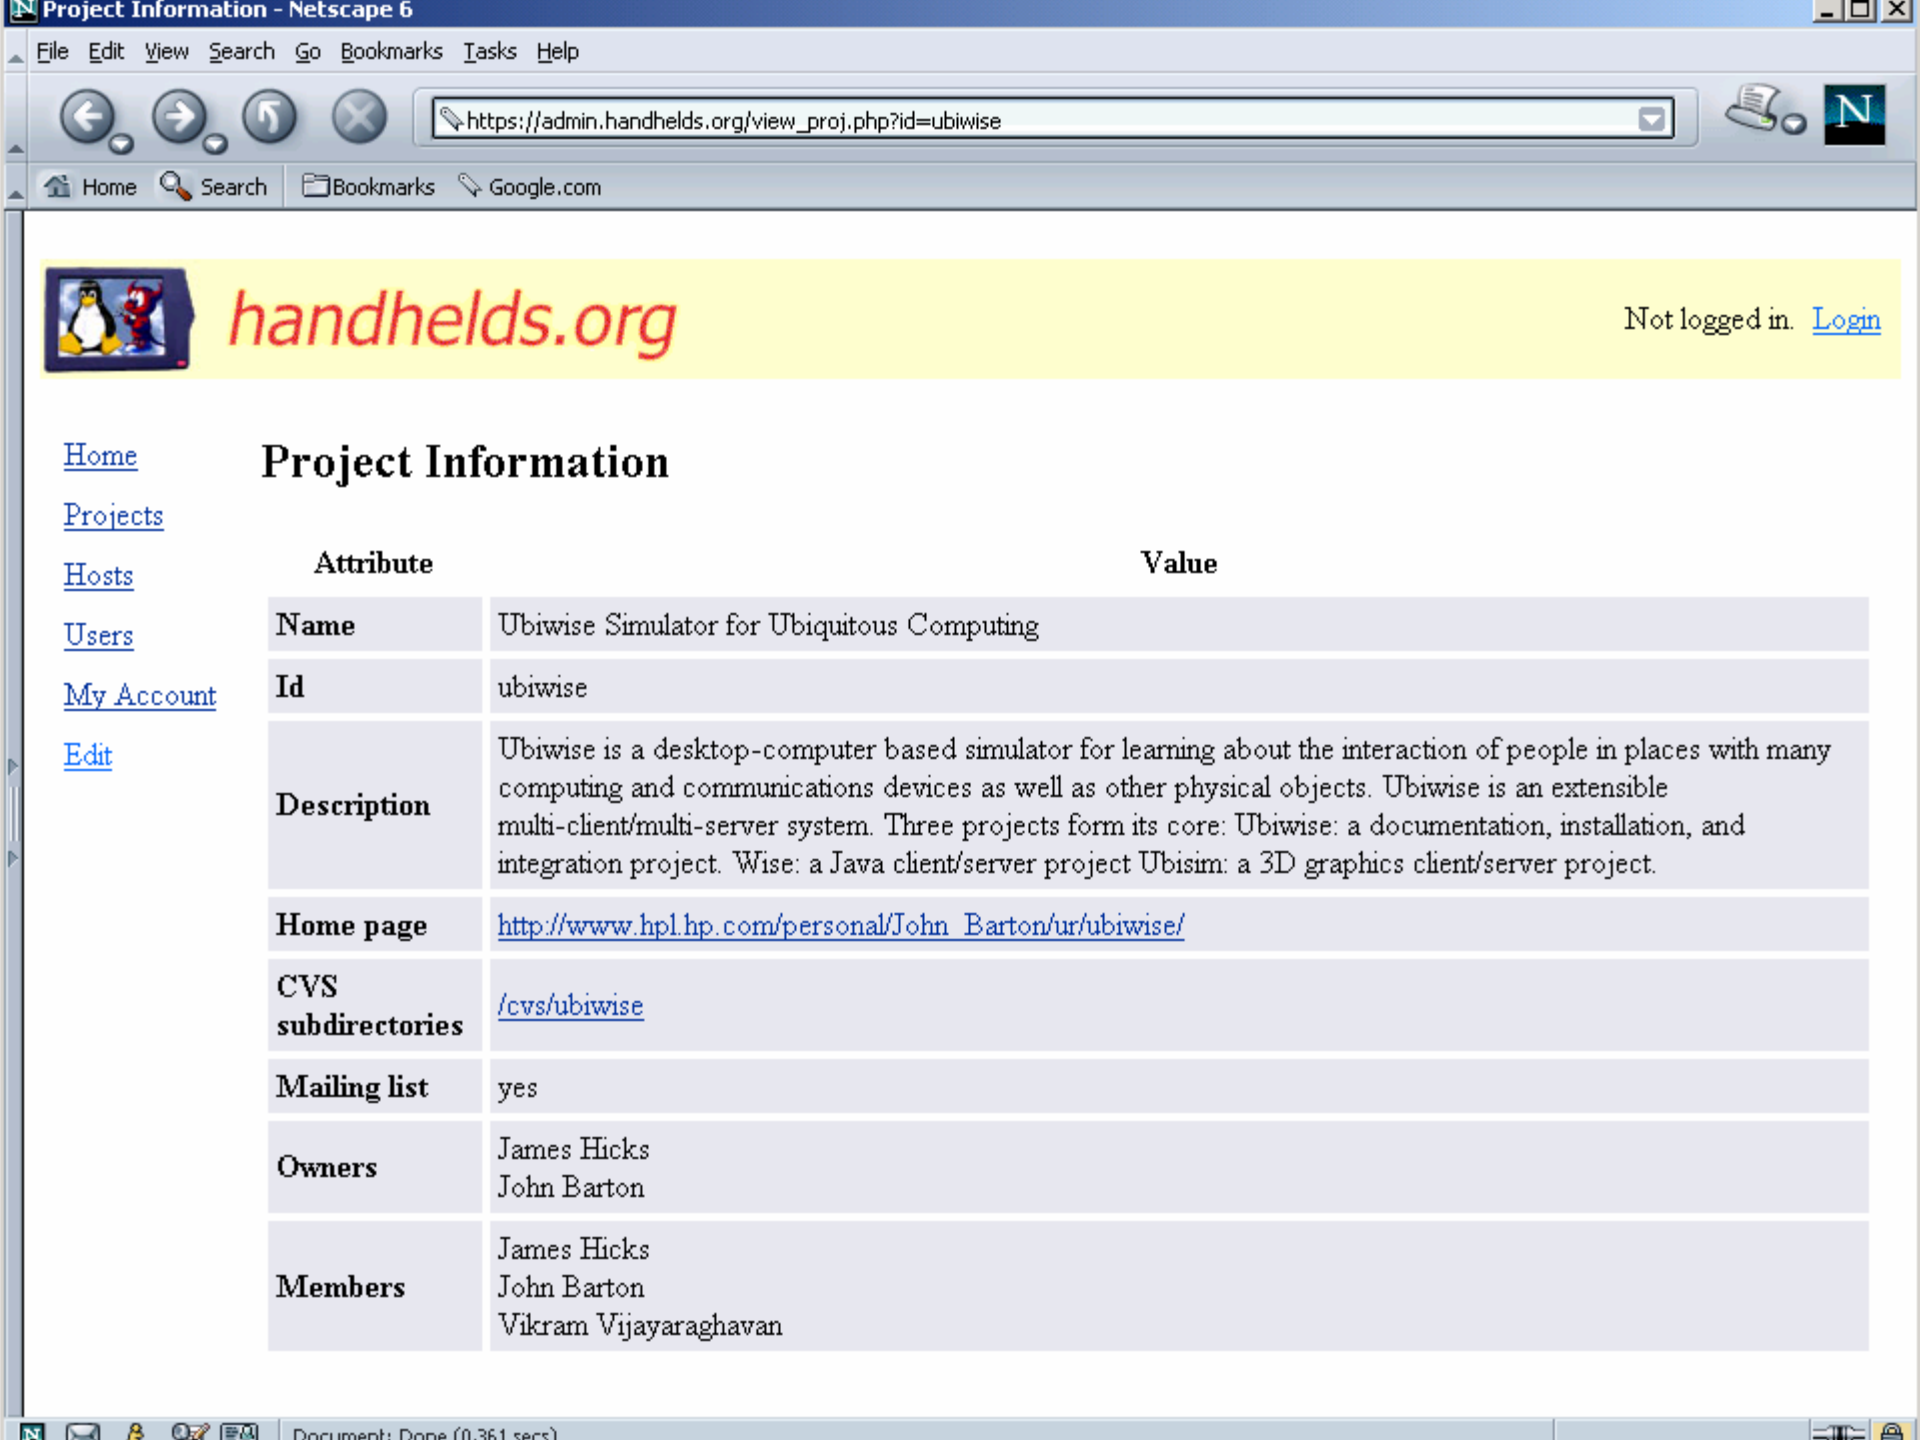

- Use it in our own work
 - *Glimmer Project*
- Help others use it; adapt it.
 - *Agile Web browser*
- Offer it; “market” it
 - <http://handhelds.org>

If Ubicomp Folk Use It, It's Useful

Glimmer Project With UbiWise

Project Information

Attribute	Value
Name	Ubiwise Simulator for Ubiquitous Computing
Id	ubiwise
Description	Ubiwise is a desktop-computer based simulator for learning about the interaction of people in places with many computing and communications devices as well as other physical objects. Ubiwise is an extensible multi-client/multi-server system. Three projects form its core: Ubiwise: a documentation, installation, and integration project. Wise: a Java client/server project Ubisim: a 3D graphics client/server project.
